Table of Contents

### Preface

Organisation

XXIII

XXV

### Müller lecture

From empiricism, through theory, to problem solving in rock engineering

N.R. Barton

3

### Rocha Medal lecture

Reduction of blast-induced vibration in tunnelling using barrier holes and air-deck

D. Park

17

### Invited lectures on ISRM 50th anniversary

Fifty years of the ISRM and associated progress in rock mechanics

E.T. Brown

29

The next 50 years of the ISRM and anticipated future progress in rock mechanics

J.A. Hudson

47

New developments of rock engineering and technology in China

Q.H. Qian

57

### Keynote lectures

New rock mechanics developments in China

X.-T. Feng

71

Rock strength and failure: Some common and uncommon issues

A.J. Gonzalez-Garcia

81

Discontinuum models for dam foundation failure analysis

J.V. Lemos

91

Discontinuous deformation analysis: Advances and challenges

G.W. Ma

99

Synthetic rock mass applications in mass mining

M.E. Pierce & C. Fairhurst

109

How to select rock mass parameters for analysis and design

T. Ramamurthy & A. Ghazvinian

115

Risk oriented design and construction of tunnels

W. Schuhert

127

Support of excavations subjected to dynamic (rockburst) loading

T.R. Stacey

137

Advances in rock dynamics modelling, testing and engineering

J. Zhao, Y.X. Zhou & K.W. Xia

147
Analysis and design methods

Mine-by experiment performed in the Callovo-Oxfordian claystone at the Meuse Haute Marne underground research laboratory (France)
G. Armand, A. Noiret, M. Cruchaudet & N. Conil

Burgers rock creep around axisymmetric tunnels
S.D. Athanasopoulos, P.P. Nomikos & A.I. Sofianos

Multi-parameter responses of soft rocks during deformation and fracturing and their implications in geomechanics and geotechnical engineering
O. Aydan, Y. Ohta & H. Tano

Fractal approach to determine rock mass strength and deformation
M.N. Bagde, A.K. Raina, P.B. Choudhury & A. Sinha

A theoretical analysis of core extrusion and squeezing behaviour in tunnelling
L. Cantieni, G. Anagnostou & R. Hug

Applications of strain based damage criterion in geotechnical engineering
Y. Chang

Solving some problems of geomechanics on the base of defining relations of post-limit deformation of rocks
A.I. Chanyshev, I.M. Abdulin & O.E. Belousova

The structural geology contribution to rock mechanics modelling and rock engineering design
J.W. Cosgrove & J.A. Hudson

Rock mass instability caused by incipient block rotation
A.V. Dyskin & E. Pasternak

Attempt to advanced observational construction considering predictive analysis of long-term deformation
T. Fukuda, T. Takahashi, H. Yamada & Y. Jiang

Vector sum method: A new method for anti-sliding stability analysis
X.R. Ge

Design of a railway tunnel parallel to an existing tunnel
R.K. Gael, A. Swarup, R.K. Dayal & V. Bhardwaj

Shear failure mechanism in oil wells due to reservoir compaction "A case study in Gachsaran formation, Iran"
M. Gorjian, M. Moosavi, H. Memarian & H. Ajamzadeh

Fractal analysis on the fracture development of sandstone using AE measurement
Z.Y. Yang, T.H. Huang, Y.X. Zhao & M.C. Tsai

Static and dynamic response analyses of rock mass considering joint distribution and its applicability
N. Iwata, T. Sasaki, & R. Yoshinaka

Numerical study on zonal disintegration of rock mass around deep underground openings
P. Jia, C.A. Tang & Y.B. Zhang

The secondary lining design of subsea tunnel due to water inflow

An assessment of rock pillar considering excavation damaged rock zone
W.-B. Kim, T. Ha & H. Yang

Response of granite under strain controlled loading and effect of support system on behaviour of large underground cavern
Rakesh Kumar, K.G. Sharma & A. Varadarajan

Determination of backfill requirements in multi-reef mining using numerical modelling
K.B. Le Bron & R.A. Johnson

Comparisons between two empirical yield criteria for rock masses
A.J. Li & R.S. Merifield

Buckling failure of highly-stressed hard rocks surrounding deep underground openings and confining effects of backfilling material
D.Y. Li, X.B. Li, Z.X. Liu, C.D. Ma & L.N.Y. Wong

Bemposta II powerhouse shaft: Geotechnical characterization, design and construction
C. Lima, E. Resende, C. Esteves & J. Neves
Initiation and evolution of failure zones in the vicinity of heterogeneities in rock masses:
Seismology and deep oil well stability problems

Monitoring of cracks opening in the walls of deep pits
V. Oparin & V. Vostrikov

Mine plug design for the San Genaro Ramp
A.A. Samaniego & R.L. Cabrera

A case study of alteration effects in granitic rocks on rock cavern stability at Jinzhou of NE China
Y.J. Shang & Y.Y. Shi

Design of tunnels in jointed rock on the basis of mechanical models and classification systems
R. Sommer & W. Witte

A study on mechanical behaviors of concrete lining and rock caused by shaft sinking at the Hononobe underground research laboratory
K. Tsusaka, D. Inagaki, M. Kotke, Y. Ijiri & Y. Hatsuyama

Use of rock mass classifications for design: Recommendations and suggestions
C. Viberti & P. Vaskou

Analysis to the design factors of the diversion tunnel plug based on additional rock elastic resistance
K. Wang, M.J. Zhao & X. Sun

The influence of bedding angle on failure mechanisms in sandstone
P.L.P. Wasantha, P.G. Ranjith, D.R. Viete, A. Haque, J. Kodikara & A. Bouazza

Estimating the porosity-depth relation of sedimentary rocks from an effective stress/stress history-dependent porosity model
W.-J. Wu, J.-J. Dong, J.-H. Wu & S.-S. Lin

Experimental study on constitutive models of rocks under loading with active confining pressure

Global stability analytical method of cavern group in salt rock based on energy criterion
Q. Yang, J.Q. Deng, Q.C. Lu & Y.R. Liu

Analytical study on underground continuous impervious curtain for shaft lining treatment at eastern Chinese coal mines
Q. Yu, H. Shimada, T. Sasaoka & K. Matsui

Back-analysis of schistose rock mass strength parameters based on displacement monitoring data
X.P. Zhang, L.N.Y. Wong & S.J. Wang

Different analytical models and methods to study wave propagation across rock joints
J.B. Zhu, W. Wu & J. Zhao

Numerical modelling

Coupled flow-deformation simulation for mine scale analysis of cave initiation and propagation
D.A. Beck & G. Putzar

A numerical analysis of a four-way coal mine intersection with primary and secondary supports
Y.P. Chugh & B. Ablasi

3-D modeling and parameters research of irregular shape particles for DEM based on computerized tomography
X. Da, Y.W. Zeng, R. Gao & J. Yan

Three-dimensional thermomechanical modelling of backfilling of old mining rooms in the Morsleben repository
S. Fahland, R. Eickemeyer & St. Heusermann

Development of a non-contact survey method of tunnel excavation face for DEM modelling
A.M. Ferrero, G.F. Fortani, R. Migliazza & R. Roncella

Numerical simulation of crack propagation in rock by clumped particle model
T. Funatsu & N. Shimizu

Stability modelling of isolated rock blocks at the surface of underground excavations taking into account in-situ stresses
R. Ghazal, F. Hadj-Hassen & M. Tijani
Back analysis of tunnel response using the Differential Evolution Genetic Algorithm (DEGA)
M. Gutierrez, S. Vardakos & C. Xia

The assessment of the hydro-jacking risk of the pressurized water tunnel by theoretical and numerical method
T.W. Ha, Y.W. Shin, H.G. Lee & H.S. Yang

Dynamic analysis of rock tunnel failure by using 3-D Numerical Manifold Method
L. He, X. Huang & G.W. Ma

Thermomechanical modelling of the Gorleben exploration site to analyse the integrity of the salt barrier
St. Heusermann, P. Vogel, R. Eickemeier & H.-K. Nipp

Response of nuclear waste repository host rock to thermo-mechanical loads
H. Hökmark & M. Lönnqvist

Mixed complementary formulation of discontinuous deformation analysis and solution
W. Jiang & H. Zheng

X-ray CT technology-based finite element simulation of coal samples under uniaxial compression
Y.D. Jiang, W.J. Wang, Y.X. Zhao, L. Zhang & J.L. Han

Pumping simulations using 3D analysis on multi-pumping wells
T. Kitaoka, H. Kusumi & M. Nakamura

Abutment stability assessment of the Hongrin arch dam using 3D distinct element method
A. Koliji, T. Bussard, A. Wohlleb & J. Zhao

Development of numerical model for grout injection and its application to the real in-situ injection tests

Modelling the evolution of fractures using a combined FEM-DEM numerical method
J.-P. Latham, L. Guo, X. Wang & J. Xiang

A constitutive contact law for discrete element modeling of sandstone
L. Li

Numerical modeling of rock cutting

Strength symmetry with respect to the stress state imposed by Mogi's theory against long-prevailing observations
X.D. Ma & R.J. Rodriguez

Scale effects in a synthetic rock mass
C.D. Martin, Y. Lu & H. Lan

2D-/3D-stress analysis of deep-seated gold mines in South Africa
F. Menschik, K. Thuro, H. Käslind & M. Bayerl

Numerical modeling for the evaluation of grout penetration in fractured rock masses
Y. Mito, M. Ashraf & T. Yamamoto

Numerical method for determining contact areas of a rock joint under shear load
J.-W. Park, Y.-K. Lee & J.-J. Song

Approximate methods in numerical rock mechanics modelling
J.J. Pera, J.P. Pöllä & I. Konstantias

Hydromechanical modeling of an underground excavation with an elastoviscoplastic behavior law and regularization
R. Plassart, R. Fernandes, F. Laigle, A. Giraud & D. Hoxha

Implementation of ANN-based rock failure criteria in numerical simulations
H. Raffai & A. Safari

Stochastic model generation for discontinuous rock mass media and numerical analysis using the NSCD method (case study: Saint-Béat gallery in the southwest of France)
A. Rafiei, M. Gasc-Barbier & M. Vinches

Rock fracture propagation from mechanical, thermal and hydraulic loadings
M. Rinne, B. Shen & O. Stephansson

Meshless simulation of rock mechanics problems by Element Free Galerkin Method
H. Solari-Rad & M. Rahimi Diazadi

Applications of two dimensional discontinuous deformation analysis
G.H. Shi
Stochastic boundary element method for fracture reliability analysis
K.J. Shou & H.Y. Yu

Numerical anisotropic fracture mechanics modelling in crystalline rock
T. Siren, K. Kemppainen, B. Shen & M. Rinne

Contact description in numerical simulation for rock mechanics
L. Sun, J. Zhao & G.F. Zhao

Numerical investigation of the potential applicability of surface deformation measurement by InSAR technology for monitoring CO₂ behavior in deep underground
H. Yamamoto, T. Onuma, T. Kumagai & J. Rutqvist

An introduction to Distinct Lattice Spring Model (DLSM)
G.F. Zhao, N. Khalil & J. Zhao

A discussion about boundary conditions in numerical simulation and its application in mining-induced rock mass movement
H.J. Zhao, F.S. Ma, Y.M. Zhang, J. Guo & A.H. Wei

Theoretical and experimental modeling of material hardening and softening by compression tests
V.M. Zhigalkin, V.N. Semyonov, O.M. Usoltseva, P.A. Tsoi, A.I. Chanychev & I.L. Abdulin

Multiple scale numerical modeling of growth process of multiple cracks in rock mass
X.P. Zhou, H.Q. Yang & Y.X. Zhang

Laboratory testing and rock properties

Mechanical behavior of Callovo-Oxfordian claystone-steel interfaces at high levels of normal stress in “dry” and “wet” conditions
M. Boulon, M. Keshavarz, G. Armand, N. Conil & E.L. Pellet

Micromechanics and microcrack growth in granite during fatigue process
Y. Chen, A. Yamazaki, H. Kusuda, E. Kusaka & M. Mabuchi

An experimental study on deformation and strength anisotropy of transversely isotropic rocks in Korea
J.-W. Cho, H. Kim, S. Jeon & K.-B. Min

Mechanical rock properties prediction: Deriving rock strength and compressibility from petrophysical properties
B. Crawford, B. Alamah, P. Gaillet, P. Sanz & N. DeDontney

Behaviour of carbonated rocks under true triaxial compression

Mechanical rehearsals in special slate schists to potentiate constructive solutions of structures with great slenderness
L.M. Ferreira Gomes, C.R.V. Batalha, P. Gabriel de Almeida, L.J. Andrade Pais & E. Mendes

An appraisal and modification of Ramamurthy criterion on anisotropic rocks
A. Ghazvinian, M.R. Hadet, H.R. Nejatu & V. Sarfarazi

Effects of fracture size and normal stress on the shear behavior of a fracture as estimated by mortar replica
A.A. Gweli, K. Matsuki, K. Sakaguchi, A. Kizaki, H. Sekino & K. Okatsu

Study of the short and long-term brittle behavior of a porous rock with continuous monitoring of (P- and S-) wave velocities under different hydrous conditions
D. Grgic, D. Hosha & J. Eslami

The effect of certain chemical solutions on some material properties of clay bearing rocks
P. Hogan, S. Saydam, E. Elias, L. Deramore Denver & B. Hebblewhite

Creep test of tuff for over thirteen years and its know-how
K. Hashiba, S. Okubo & K. Fukui

Macro-fracture characteristics of granite in different boundary conditions
M.C. He, W. Nie, Z.Y. Zhao & C. Cheng

Experimental analysis of deformation mechanisms induced by desiccation in Tournemire argillites using DIC method

Radiology of Canarian volcanic rocks
L.E. Hernández, A. Eff-Darwich, R. Viñas & J.A. Rodríguez-Losada
A new laboratory test for shear fracture formation and its permeability measurement
T. Ito, T. Shono, K. Sekine & K. Yamamoto

Direct shear and tensile test on cemented healed joints from El Teniente mine, Chile
L. Jacobsson, M. Flansbjer, A. Brzovic & C. de los Santos

Rheological behavior of sandstone under unloading
Y.Z. Jiang & R.H. Wang

Strength evaluation of discontinuous rock mass by multi-scale limit load analysis
J. Jung, J. Kato, K. Terada & T. Kyoya

Estimation of fracture toughness of anisotropic rocks by SCB test and visualization of fracture by means of X-ray CT
M. Kato, Y. Obara & M. Kuruppu

Laboratory measurement of poroelastic and hydraulic constants of sedimentary rocks focused on pore water discharge from specimen with its deformation
M. Kato, H. Park, M. Takahashi & K. Kaneko

Relationship between point load strength and uniaxial compressive strength of hydrothermally altered soft rocks
M. Kohno & H. Maeda

Study on the dilatancy angle of rocks in the pre-failure domain
M. Kwaśniewski & P. Rodriguez-Oitabén

The thermal and mechanical properties around an underground research tunnel in granite body
S. Kwon, J.S. Kim, C.S. Lee & W.J. Cho

Shear behavior model of rock joints applicable to CNL and CNS conditions
Y.-K. Lee, J.-W. Park & J.-J. Song

Evaluation of shear velocity dependency of rock fractures by using repeated shear tests
B. Li, Y. Jiang & G. Wang

An elastic-plastic-brittle constitutive model of rocks and its numerical validation
Q. Li, D.G. Wang, J.H. Xiong & L. Song

Drilling geological strength index in altered gneiss
D.M. Lin, Y.J. Shang & W. Zhang

Investigation on mechanical parameters of water-rock interaction
Y. Lu & T. Lu

Surface roughness measurements using three-dimensional laser imaging
J. Mah, C. Samson & S.D. McKinnon

Understanding failure mode in uniaxial and triaxial compression for a hard brittle rock
V.B. Maji

The mechanical properties of CO₂-saturated coal specimens
M. Masoudian-Saadabad, D.W. Airey, A. Gainey, T. Morris & J. Berger

Analysis of uniaxial tensile fracture of monomineral polycrystalline rock based on intergranular cracking
K. Matsuki, Y. Karino, K. Sakaguchi & A. Kizaki

Determination of a correlation between intact rock unconfined compressive strength and index parameters
H.J. Mendietta

Experimental research on the electrical parameters of coal mass under load
L. Meng, M.J. Liu, Y.D. Jiang, Y.X. Zhao & Y.G. Wang

Creep property of artificial methane-hydrate-bearing rock
K. Miyazaki, Y. Sakamoto, K. Aoki, N. Tenma, T. Yamaguchi & S. Okubo

An investigation of brittle rocks failure mechanism based on the damage mechanics
H. Molladavoodi & A. Mortazavi

Influence of humidity and rock fabric on subcritical crack growth in rock
Y. Nara, K. Kaneko, T. Yoneda, N. Hiroyoshi & K. Morimoto

Estimating the basic friction angle of a very strong meta-sandstone for rockfill strength prediction
D.J.M. Ngan-Tillard & A. Mulder
Application of pattern recognition analysis of rock acoustic emission for determination of Kaiser Effect
M. Nikkhah, M. Ahmadi & A. Ghazvinian

Acoustic emission of Dionysos marble specimens in uniaxial compression
P.P. Nomikos, K.M. Sakkas & A.I. Sofianos

An elaborative evaluation of various methods for simultaneous estimation of uniaxial compressive strength and elasticity modulus of intact rocks
R. Noorani & M. Hesami

Drying-induced deformation and consequent change in mechanical properties of sedimentary rocks
M. Osada, N.M. Adikaram & T.N. Illankoon

Assessment of clay minerals around fault using slake durability test and reflectance spectroscopy
C.-S. Park, C.-U. Hyun & H.-D. Park

Relation between mechanical properties of rock and sedimentary structure
H. Park & M. Takahashi

Estimation of uniaxial compressive strength of weak rocks using needle penetrometer
Y.-H. Park, Y. Obara, & S.-S. Kang

Testing of fiber reinforced sprayed concrete – influences on the energy absorption capacity
G. Pitzino & Y. Bian

A comparative study of m, the Hoek-Brown constant for intact rock material
S.A.L. Read & L. Richards

Inconsistencies in the determination of the compressive strength of intact rock
M. Romana

Effect of heat on the mechanical properties of selected rock types – a laboratory study
C. Saång & K. Miskovsky

Weathering mechanisms and mechanical property changes of Oya tuff
T. Seki, A. Satoh & K. Kikuchi

Relationship between the rupture modulus and the flexural strength of building and decorative stones of Iran
K. Shahrar, M.S. Dehkordi & H.A. Lazemi

Shear behavior of rock under different normal stiffness
A.K. Shrivastava, K.S. Rao & G.W. Rathod

On the reliability of the uniaxial compressive strength obtained from the point load index
L.O. Suarez-Burgos

Preliminary laboratory thermo-hydro-mechanical characterization of Opalinus clay
A.M. Tang & Y.J. Cui

Experimental evidences of dramatic embrittlement of hard rocks due to rising confining pressure at triaxial compression
B.G. Tarasov

Method of determination of orthotropy ratio and principal material direction for orthotropic rock material with diametrical compression test
T. Tsutsumi

Influence of confinement dependent failure processes on rock mass strength at depth

Nondestructive evaluation of granite building stones and relation with key mechanical parameters
G. Vasconcelos, C.A.S. Alves & T. Miranda

Relation between tensile and compressive engineering properties of granites
G. Vasconcelos, P.B. Lourenço, C.A.S. Alves, J. Pamplona & T. Miranda

Modeling the deformation behavior of sandstone using a bonded-particle model

Initiation and propagation of tensile wing cracks and anti-wing cracks from a pre-existing open flaw under compression
L.N.Y. Wong & H.Q. Li

Physico-mechanical and thermo-mechanical characterisation of sandstone
G. Wu, Y. Wang, G. Swift & J. Chen
Prediction of rock mass along tunnels by geostatistical method
K. Kaewkongkaew, N. Phien-wej & D. Khiamai
427
Developing in situ stresses estimation algorithm using a hybrid numerical method based
on local stress measurement-case study: Seymare dam
K. Shahriar, M. Gharouni Nik & Z. Khademian
428
In situ stress determination by hydro jacking tests on fractured rock mass
M.A. Kaji
430
A case study on in situ testing of rock mass deformability
B. Kavar, N. Stambuk Cvitanovic & I. Vrkljan
432
In situ rock stress-strength comparison: Posiva’s Olkiluoto Spalling Experiment (POSE)
K. Kemppainen, M. Hakala, E. Johansson, H. Kanila & J.A. Hudson
434
Comparison of monitoring items for hazardous ground in subsea tunnels
H. Kim & S. Jeon
437
Determination of principal stress orientations from wireline logging caliper data and borehole images
in deep drilling
W. Lin
440
Experimental and numerical analysis of rock block stability using a remotely positioned laser
Doppler vibrometer
G.C. Ma, K. Sawada, A. Yashima, F. Uehan, O. Murata, H. Saito & Y. Ootsuka
441
Investigation of spalling failure at Nayriz Marble Mine (Iran)
M. Moosavi, H.M. Doghicio, M. Goodarzi, N. Ghavami & F. Moosavi
446
Geotechnical and monitoring challenges during excavation of a large urban tunnel in soft ground
and low overburden
B. Moritz, R. Matt & R. Heissenberger
448
A study of the compound evaluation for geophysical explorations by self-organizing maps
M. Nakamura, H. Kusuki, T. Yamamoto & T. Tsuji
449
Measurement of exterior deformation of an earth-filled dam using GPS displacement monitoring system
S. Nakashima, H. Kawasaki, N. Shimizu, S. Kubota & T. Nakano
450
An innovative method to determine the indirect deformation modulus of rock masses in Asmari formation of Iran
A. Noorzad, K. Ahangari & A. Haghtefad
456
Measurement of rock stress change by Cross-sectional Borehole Deformation Method (CBDM)
458
Rock investigations for the construction of railway tunnel through Slovenian Karst
B. Petkovsek, J. Prestor & A. Gerak
460
In-situ test program for fault zone characterization
T. Pilgerstorfer & W. Schubert
461
Geological origin and stability analysis of the Suodaxi accumulation body in the upper reaches of the Jinsha River
462
In situ rock stress measurement using an improved Downward Compact Conical-ended Borehole Overcoring technique
K. Sakaguchi, A. Kizaki & K. Matsuki
464
Laser scanning images analysis for tunnel inspection
E. Sandrone & R. Wissler
465
Numerical simulations of hydraulic fracture intersecting an interbed of sandstone
M. Sarmadivaleh, V. Rasouli & W. Ramses
457
GPS displacement monitoring system for the precise measuring of rock movements
Y. Shimizu, T. Masanari & T. Iwasaki
458
A study on prediction of squeezing and rockburst based on surface exploration for selection of
HLW disposal site in Japan
459
Evaluation of stresses based on overburden and in-situ measurements
R. Singh
460
XIII
Stress parameter analysis in hydraulic fracturing with open fracture pattern
J.-H. Synn, Chan Park, Chulwhan Park & K.-S. Kim

Nanoseismic monitoring of shallow caverns for detection of incipient failures
M. Tsesarsky & G.H. Wust-Bloch

The stability of an underground congress center in soft tuffs through an integrated in-situ monitoring, experimental, analytical and numerical methods (Capadocia, Turkey)
R. Ulusay, O. Aydan, M. Geni & H. Tano

Evaluation study of nozzle design selection for hydraulic fracturing test on concrete, limestone and andesite with triaxial loading at the laboratory

Seismic imaging of stressed pillars in abandoned coal mines: Case studies from Australia
R.J. Whiteley

Dynamics and blasting

Damping analysis with depth and influence of geology on the transmission of vibrations generated by blasts
M.I. Alvarez-Fernandez, C. Gonzalez-Nicieza & A.E. Alvarez-Vigil

Comparison of blast-induced ground vibration predictors in Seyitomer coal mine
E. Arpaz, O. Uysal, Y. Tola, K. Görgülü & M. Çavuş

A new testing station for rock impact on full-scale structures
M. Bost, S. Loock, L. Lenti, F. Rocher-Lacoste, J. Gineys & L. Dubois

Mechanical behaviour of rock discontinuities under seismic conditions
L. Canelli, A.M. Ferrero, M. Migliazza & A. Segalini

Dynamic responses of tunnels subjected to Rayleigh wave

Dynamic tensile-splitting tests of rocks

Characterization of dynamic rock fracture parameters using Notched Semi-circular Bend (NSCB) method and Cracked Chevron Notched Brazilian Disc (CCNBD) method
F. Dai & K. Xia

Numerical simulation of train-induced vibrations in rock masses
A. Eitzenberger, P. Zhang & E. Nordlund

Effect of micro-defects and macro-joints on stress wave propagation in rock mass
L.F. Fan, F. Ren & G.W. Ma

Progress in study of rockburst experiments and control countermeasures
M.C. He, X.N. Jia, W.L. Gong, G.J. Liu & J.T. Zhang

Evaluation of dynamic behaviors of bedrock foundation based on FEM and DEM simulations
Y. Jiang, L. Yang, Y. Tanabashi, B. Li & S. Li

Application of discrete element method for validity evaluation of rock dynamic fracture toughness measured by semi-circular bend technique
T. Kazerani & J. Zhao

The mechanism behind seismic damage to railway mountain tunnels and assessment of their aseismic performance

Destress rock blasting as a rockburst control technique
P. Konicek, P. Koncny & J. Ptacek

Dynamic test of a high energy-absorbing rock bolt
C.C. Li

A 1D equivalent medium method for wave propagation across parallel jointed rock mass
J.C. Li, H.B. Li, G.W. Ma & J. Zhao

Effects of decoupled charge blasting on rock fragmentation efficiency
W. Liang, H.Y. Liu, X. Yang & D.J. Williams

Modelling earthquake-induced rock failures using NMM and DDA
Y.J. Ning, X.M. An, Z.Y. Zhao & G.W. Ma
Prediction of rockburst based on an accident database
A. Peixoto, L. Ribeiro e Sousa, R. Leal e Sousa, X.-T. Feng, T. Miranda & F. Martins

An investigation on stress wave propagation in micromechanical models of rock
R. Resende, L.N. Lamas, J.V. Lemos & R. Calçada

A comparison of empirical methods and evolutionary programming to predict blast-induced ground vibration
A. Sadeghnej & H. Khoshrou

Effective explosive energy utilization for engineering blasting – initial results of an inventive stemming plug, SPARSH
Md. Sazid, M.R. Saharan & T.N. Singh

Rock support subjected to dynamic loading: Field testing of ground support using simulated rockburst
S. Shirzadegan, E. Nordlund, U. Nyberg, P. Zhang & L. Malmgren

Effects of loading rate on compressive strength of Maha Sarakham salt
T. Sriapai, P. Samsri & K. FuenkaJohn

Effect of artificial discontinuities on blast induced vibrations in open pit mines
O. Uysal, E. Arpaz, M. Cavus, S. Beyhan, Y. Tola & S. Yuval

Wave propagation in inhomogeneous orthotropic rocks
C.D. Wang, D.S. Wu & J.J. Liao

Experimental investigation on dynamic mechanical performances of granite
W. Wu, Y. Hu, X. Ren & Y. Xiong

The application of smooth blasting for freezing rock in vertical shaft

Fluid and gas flow

Experimental and numerical study on the behavior of supercritical CO2 injected to low permeable rocks
A. Arsyad, Y. Mitani, H. Ikemi, K. Kaze & S. Oura

A fully coupled thermoporoelastic model for drilling in HPHT formations
A. Diek, L. White, J.-C. Roegiers & D. Blankenship

Hydraulic stimulation of geothermal wells: Modeling of the hydro-mechanical behavior of a stimulated fractured rock mass
S. Gentier, X. Rachez, M. Peter-Borie & A. Blaisonneau

Investigation of thermal effect on stability of deep wellbores in low and high permeable formations
Z. Hou & X. Liu

Modelling and optimization of multiple fracturing along horizontal wellbores in tight gas reservoirs
Z. Hou & L. Zhou

Dependence of fracture geometry and spatial variation in pressure on hydraulic conductivity in rock fractures
K. Kishida, T. Hosoda, A. Sawada, H. Sato, S. Nakashima & H. Yasuhara

Analytical solutions for poroelasticity within a finite two-dimensional domain
P.C. Li & D.T. Lu

Mechanical effect of the presence of gas on faults modeled as a sandwiched Cam-Clay material
V. Maury, J.-M. Piau & D. Fitzenz

Impact of fluids and formation anisotropy on acoustic, deformation and failure characteristics of reservoir shales and pure clay minerals
A.N. Tutuncu & A.I. Mese

Change of joint aperture during formation of ice-ring around underground LNG storage cavern

A parametric study to investigate the effect of injection and production well operation on the CO2 sequestration process in deep unmineable coal seams
M.S.A. Perera, P.G. Ranjith & S.K. Choi

Development of the confined pressure type of multi-purpose rock flow system and its application to the evaluation of permeability of various geomaterials
A. Sato, H. Yoshihiko, T. Shiono & K. Sasa

Near-field application of aperture back calibrated distinct fracture network
M. Sharifzadeh & M. Javadi
A combined Bayesian-Wavelet-Data fusion workflow for breakout zone identification in oil and gas wells
H. Soroush & V. Rasouli

Hydraulic stress effect on 3 dimensional pore network and permeability change
M. Takahashi, C. Ahn & M. Kato

Algorithm of coupled seepage and normal stress processes in fractured rock mass by composite element method
L.L. Xue, S.H. Chen & I. Shahrour

Evolution of fracture permeability in granite under temperature, confining pressure and pH conditions prescribed
H. Yasuhara, N. Kinoshita, S. Nakashima & K. Kishida

Physical clogging model using stick rate of calcite on CO₂ mineral trapping
S.Y. Yoo, Y. Mito, T. Matsuoka, Y. Kurosda & A. Ueda

Risks and hazards

The SEALEX in situ experiments: Performance tests of repository seals
J.D. Barnichon, P. Dick & C. Bauer

Post-closure hydromechanical behaviour of a backfilled cavity
N. Dufour, H. Wong & F. Deleruyelle

Risk assessment of carbon dioxide storage in carboniferous formations
H. Manchao, R. Leal e Sousa, A. Gomes, L. Ribeiro e Sousa, E. Vargas Jr. & Zhang Na

Optimisation of a borehole-tunnel concept design for HLW disposal in granite using a 3D coupled THM modelling
H. Kunz, H.-G. Zhao, H. Shao, J. Hesser, J. Wang & V. Brüner

Design and development of a large-scale THMC experiment of compacted bentonite for geological disposal of high level radioactive waste in China
Y.M. Liu, J. Wang, X.G. Zhao, D. Ke, J.L. Xie, S.F. Cao, L.K. Ma, W.J. Jiang & L. Chen

Is hydraulic jacking a threat to the long-term safety of a nuclear waste repository?
M. Lönngvist & H. Hölmark

Modelling of rockfall impact using spring-dashpot-slider system
T. Nishimura

Micro-mechanical study on the failure process of clay formations during excavation of galleries
S. You, G.F. Zhao & V. Labiouse

Criterion and classification for strain mode rockbursts based on five-factor comprehensive method
