

Contents

List of Contributors	<i>page</i> viii
Preface	ix
Acknowledgements	xi
1 The Physical Grounds of Radiative Transfer <i>Lucio Crivellari</i>	1
2 Fundamental Physical Aspects of Radiative Transfer <i>Artemio Herrero</i>	33
3 Numerical Methods in Radiative Transfer <i>Olga Atanacković</i>	81
4 Stellar Atmosphere Codes <i>Mats Carlsson</i>	117
5 Radiative Transfer in the (Expanding) Atmospheres of Early-Type Stars, and Related Problems <i>Joachim Puls</i>	151
6 Phenomenology and Physics of Late-Type Stars <i>Maria Bergemann, Camilla Juul Hansen and Timothy C. Beers</i>	191
7 Modelling the Atmospheres of Ultracool Dwarfs and Extrasolar Planets <i>Mark S. Marley</i>	223
