<b>Preface to Second Edition</b>	<b>xiii</b>
References	xv
<b>Preface to First Edition</b>	<b>xvii</b>
References	xxiii
<b>Acknowledgments</b>	<b>xxvii</b>
<b>List of Abbreviations</b>	<b>xxix</b>
<b>1 Introduction</b>	<b>1</b>
1.1 Introduction	1
1.2 Bayesian Signal Processing	1
1.3 Simulation-Based Approach to Bayesian Processing	4
1.3.1 Bayesian Particle Filter	8
1.4 Bayesian Model-Based Signal Processing	9
1.5 Notation and Terminology	13
References	15
Problems	16
<b>2 Bayesian Estimation</b>	<b>20</b>
2.1 Introduction	20
2.2 Batch Bayesian Estimation	20
2.3 Batch Maximum Likelihood Estimation	23
2.3.1 Expectation–Maximization Approach to Maximum Likelihood	27
2.3.2 EM for Exponential Family of Distributions	30
2.4 Batch Minimum Variance Estimation	34
	<b>vii</b>

2.5	Sequential Bayesian Estimation	37
2.5.1	Joint Posterior Estimation	41
2.5.2	Filtering Posterior Estimation	42
2.5.3	Likelihood Estimation	45
2.6	Summary	45
	References	46
	Problems	47
<b>3</b>	<b>Simulation-Based Bayesian Methods</b>	<b>52</b>
3.1	Introduction	52
3.2	Probability Density Function Estimation	54
3.3	Sampling Theory	58
3.3.1	Uniform Sampling Method	60
3.3.2	Rejection Sampling Method	64
3.4	Monte Carlo Approach	66
3.4.1	Markov Chains	71
3.4.2	Metropolis–Hastings Sampling	74
3.4.3	Random Walk Metropolis–Hastings Sampling	75
3.4.4	Gibbs Sampling	79
3.4.5	Slice Sampling	81
3.5	Importance Sampling	83
3.6	Sequential Importance Sampling	87
3.7	Summary	90
	References	91
	Problems	94
<b>4</b>	<b>State–Space Models for Bayesian Processing</b>	<b>98</b>
4.1	Introduction	98
4.2	Continuous-Time State–Space Models	99
4.3	Sampled-Data State–Space Models	103
4.4	Discrete-Time State–Space Models	107
4.4.1	Discrete Systems Theory	109
4.5	Gauss–Markov State–Space Models	115
4.5.1	Continuous-Time/Sampled-Data Gauss–Markov Models	115
4.5.2	Discrete-Time Gauss–Markov Models	117
4.6	Innovations Model	123
4.7	State–Space Model Structures	124
4.7.1	Time Series Models	124
4.7.2	State–Space and Time Series Equivalence Models	131
4.8	Nonlinear (Approximate) Gauss–Markov State–Space Models	137
4.9	Summary	142
	References	142
	Problems	143

<b>5</b>	<b>Classical Bayesian State-Space Processors</b>	<b>150</b>
5.1	Introduction	150
5.2	Bayesian Approach to the State-Space	151
5.3	Linear Bayesian Processor (Linear Kalman Filter)	153
5.4	Linearized Bayesian Processor (Linearized Kalman Filter)	162
5.5	Extended Bayesian Processor (Extended Kalman Filter)	170
5.6	Iterated-Extended Bayesian Processor (Iterated-Extended Kalman Filter)	179
5.7	Practical Aspects of Classical Bayesian Processors	185
5.8	Case Study: <i>RLC</i> Circuit Problem	190
5.9	Summary	194
	References	195
	Problems	196
<b>6</b>	<b>Modern Bayesian State-Space Processors</b>	<b>201</b>
6.1	Introduction	201
6.2	Sigma-Point (Unscented) Transformations	202
6.2.1	Statistical Linearization	202
6.2.2	Sigma-Point Approach	205
6.2.3	SPT for Gaussian Prior Distributions	210
6.3	Sigma-Point Bayesian Processor (Unscented Kalman Filter)	213
6.3.1	Extensions of the Sigma-Point Processor	222
6.4	Quadrature Bayesian Processors	223
6.5	Gaussian Sum (Mixture) Bayesian Processors	224
6.6	Case Study: 2D-Tracking Problem	228
6.7	Ensemble Bayesian Processors (Ensemble Kalman Filter)	234
6.8	Summary	245
	References	247
	Problems	249
<b>7</b>	<b>Particle-Based Bayesian State-Space Processors</b>	<b>253</b>
7.1	Introduction	253
7.2	Bayesian State-Space Particle Filters	253
7.3	Importance Proposal Distributions	258
7.3.1	Minimum Variance Importance Distribution	258
7.3.2	Transition Prior Importance Distribution	261
7.4	Resampling	262
7.4.1	Multinomial Resampling	267
7.4.2	Systematic Resampling	268
7.4.3	Residual Resampling	269
7.5	State-Space Particle Filtering Techniques	270
7.5.1	Bootstrap Particle Filter	270
7.5.2	Auxiliary Particle Filter	274

7.5.3	Regularized Particle Filter	281
7.5.4	MCMC Particle Filter	283
7.5.5	Linearized Particle Filter	286
7.6	Practical Aspects of Particle Filter Design	290
7.6.1	Sanity Testing	290
7.6.2	Ensemble Estimation	291
7.6.3	Posterior Probability Validation	293
7.6.4	Model Validation Testing	304
7.7	Case Study: Population Growth Problem	311
7.8	Summary	317
	References	318
	Problems	321
<b>8</b>	<b>Joint Bayesian State/Parametric Processors</b>	<b>327</b>
8.1	Introduction	327
8.2	Bayesian Approach to Joint State/Parameter Estimation	328
8.3	Classical/Modern Joint Bayesian State/Parametric Processors	330
8.3.1	Classical Joint Bayesian Processor	331
8.3.2	Modern Joint Bayesian Processor	338
8.4	Particle-Based Joint Bayesian State/Parametric Processors	341
8.4.1	Parametric Models	342
8.4.2	Joint Bayesian State/Parameter Estimation	344
8.5	Case Study: Random Target Tracking Using a Synthetic Aperture Towed Array	349
8.6	Summary	359
	References	360
	Problems	362
<b>9</b>	<b>Discrete Hidden Markov Model Bayesian Processors</b>	<b>367</b>
9.1	Introduction	367
9.2	Hidden Markov Models	367
9.2.1	Discrete-Time Markov Chains	368
9.2.2	Hidden Markov Chains	369
9.3	Properties of the Hidden Markov Model	372
9.4	HMM Observation Probability: Evaluation Problem	373
9.5	State Estimation in HMM: The Viterbi Technique	376
9.5.1	Individual Hidden State Estimation	377
9.5.2	Entire Hidden State Sequence Estimation	380
9.6	Parameter Estimation in HMM: The EM/Baum-Welch Technique	384
9.6.1	Parameter Estimation with State Sequence Known	385
9.6.2	Parameter Estimation with State Sequence Unknown	387
9.7	Case Study: Time-Reversal Decoding	390

9.8	Summary	395
	References	396
	Problems	398
<b>10</b>	<b>Sequential Bayesian Detection</b>	<b>401</b>
10.1	Introduction	401
10.2	Binary Detection Problem	402
10.2.1	Classical Detection	403
10.2.2	Bayesian Detection	407
10.2.3	Composite Binary Detection	408
10.3	Decision Criteria	411
10.3.1	Probability-of-Error Criterion	411
10.3.2	Bayes Risk Criterion	412
10.3.3	Neyman–Pearson Criterion	414
10.3.4	Multiple (Batch) Measurements	416
10.3.5	Multichannel Measurements	418
10.3.6	Multiple Hypotheses	420
10.4	Performance Metrics	423
10.4.1	Receiver Operating Characteristic (ROC) Curves	424
10.5	Sequential Detection	440
10.5.1	Sequential Decision Theory	442
10.6	Model-Based Sequential Detection	447
10.6.1	Linear Gaussian Model-Based Processor	447
10.6.2	Nonlinear Gaussian Model-Based Processor	451
10.6.3	Non-Gaussian Model-Based Processor	454
10.7	Model-Based Change (Anomaly) Detection	459
10.7.1	Model-Based Detection	460
10.7.2	Optimal Innovations Detection	461
10.7.3	Practical Model-Based Change Detection	463
10.8	Case Study: Reentry Vehicle Change Detection	468
10.8.1	Simulation Results	471
10.9	Summary	472
	References	475
	Problems	477
<b>11</b>	<b>Bayesian Processors for Physics-Based Applications</b>	<b>484</b>
11.1	Optimal Position Estimation for the Automatic Alignment	484
11.1.1	Background	485
11.1.2	Stochastic Modeling of Position Measurements	487
11.1.3	Bayesian Position Estimation and Detection	489
11.1.4	Application: Beam Line Data	490
11.1.5	Results: Beam Line (KDP Deviation) Data	492
11.1.6	Results: Anomaly Detection	494

11.2	Sequential Detection of Broadband Ocean Acoustic Sources	497
11.2.1	Background	498
11.2.2	Broadband State-Space Ocean Acoustic Propagators	500
11.2.3	Discrete Normal-Mode State-Space Representation	504
11.2.4	Broadband Bayesian Processor	504
11.2.5	Broadband Particle Filters	505
11.2.6	Broadband Bootstrap Particle Filter	507
11.2.7	Bayesian Performance Metrics	509
11.2.8	Sequential Detection	509
11.2.9	Broadband BSP Design	512
11.2.10	Summary	520
11.3	Bayesian Processing for Biothreats	520
11.3.1	Background	521
11.3.2	Parameter Estimation	524
11.3.3	Bayesian Processor Design	525
11.3.4	Results	526
11.4	Bayesian Processing for the Detection of Radioactive Sources	528
11.4.1	Physics-Based Processing Model	528
11.4.2	Radionuclide Detection	531
11.4.3	Implementation	535
11.4.4	Detection	539
11.4.5	Data	540
11.4.6	Radionuclide Detection	540
11.4.7	Summary	541
11.5	Sequential Threat Detection: An X-ray Physics-Based Approach	541
11.5.1	Physics-Based Models	543
11.5.2	X-ray State-Space Simulation	547
11.5.3	Sequential Threat Detection	549
11.5.4	Summary	554
11.6	Adaptive Processing for Shallow Ocean Applications	554
11.6.1	State-Space Propagator	555
11.6.2	Processors	562
11.6.3	Model-Based Ocean Acoustic Processing	565
11.6.4	Summary	572
	References	572
<b>Appendix: Probability and Statistics Overview</b>		<b>576</b>
A.1	Probability Theory	576
A.2	Gaussian Random Vectors	582
A.3	Uncorrelated Transformation: Gaussian Random Vectors	583
	References	584
