# TABLE OF CONTENTS

**Maritime Transport & Shipping: Introduction**

A. Weinert & T. Neumann ........................................... 11

## Chapter 1. Pollution at Sea, Cargo Safety, Environment Protection and Ecology .................................................. 13

1.1. Overview of Maritime Accidents Involving Chemicals Worldwide and in the Baltic Sea

J.M. Häkkänen & A.I. Posti ........................................... 15

1.2. Factors Affecting Operational Efficiency of Chemical Cargo Terminals: A Qualitative Approach

T.A. Ginicon, S. Esmer, T. Zorba & G. Senginai ........................................... 27

1.3. The Parameters Determining the Safety of Sea Transport of Mineral Concentrates

M. Popat  ............................................................. 33

1.4. Determination of the Fire Safety of Some Mineral Fertilizers (3)

K. Kwikmatoma-Siennkewicz, P. Knita & E. Kolulska ........................................... 39

1.5. The Ecological Hovercraft – Dream or Reality?

Z.T. Pogowski & K. Szafrań ........................................................................ 45

1.6. Response to Global Environment Education for Disaster Risk Management: Disaster Preparedness of JBLFMU-Molo, Philippines

R.A. Alimen, R.L. Pador & C.D. Orlizo ........................................... 49

1.7. Marine Environment Protection through CleanSeaNet within Black Sea

S. Berescu ........................................................................ 59

1.8. Phytoplankton Diversity in Offshore, Port and Ballast Water of a Foreign Vessel in Negros Occidental, Philippines

B.G.S. Sarinas, M.I.L. Arcelo & L.D. Gelluda ........................................... 65

1.9. Study of Trawling Impacts on Diversity and Distribution of Gastropods Communities in North of Persian Gulf Fishing Area

M. Shamshahnavi, D. Dowsethens, A. Serinti, N. Sakhe & S. Deoghan Medineh ........................................... 73

## Chapter 2. Gas and Oil Transportation .................................................. 77

2.1. Future Development of Oil Transportation in the Gulf of Finland

O.P. Biruilia & J. Storgur ........................................... 79

2.2. Possibilities for the Use of LNG as a Fuel on the Baltic Sea

S. Jwkowski ........................................................................ 87

2.3. Identification of Hazards that Affect the Safety of LNG Carrier During Port Entry

P. Gackowski & A. Gackowska ........................................... 91

2.4. The Mooring Pattern Study for Q-Flex Type LNG Carriers Scheduled for Berthing at Ege Gaz Aliaga LNG Terminal

S. Nas, Y. Zorba & E. Uco ........................................................................ 97

2.5. Natural Gas as Alternative Fuel for Vessels Sailing in European Waters

J. Pawelski ........................................................................ 103

## Chapter 3. Sea Port and Harbours Development .................................................. 109

3.1. The Future of Santos Harbour (Brazil) Outer Access Channel

3.2. Port Safety: Requirements & Economic Outcomes

M.A. Hassanzadeh ........................................................................ 117

3.3. Method of Assessment of Insurance Expediency of Quay Structures’ Damage Risks in Sea Ports

M.T. Postaii & M.B. Pozner ........................................... 123

3.4. Solid Waste Management: Compliance, Practices, Destination and Impact among Merchant Vessels Docking in Jiliao Ports

B.G.S. Sarinas, L.D. Gelluda, M.M. Magrano & D.O. Doclo ........................................... 129

3.5. Keeping a Vigilant Eye: ISPS Compliance of Major Ports in the Philippines

3.6. The Using of Extruded Fenders in Yachts Ports

W. Galor ........................................................................ 139

3.7. The Positive Implications for the Application of the International Slip & Port Facility Security and its Reflects on Saudi’s Ports

A. Elentury ........................................................................ 143

7
Chapter 4. Dynamic Positioning and Offshore Technology

4.1. Verifications of Thrusters Number and Orientation in Ship’s Dynamic Positioning Systems
J. Herdzik

4.2. Underwater Vehicles’ Applications in Offshore Industry
K.A. Wredel

4.3. Coordinated Team Training for Heavy Lift and Offshore Crane Loading Teams
A. Oesterle & C. Bornhorst

4.4. A Proposal of International Regulations for Preventing Collision between an Offshore Platform and a Ship
P. Zhang

4.5. Other than Navigation Technical Uses of the Sea Space
Z. Otremba

Chapter 5. Container Transport

5.1. Development of Container Transit from the Iranian South Ports with a Focus on the International North South Transport Corridor
M. Hoseini, T. Hassanzadeh Pour, H. Khodadad Hassani & H. Yousefi

5.2. Green Waterborne Container Logistics for Ports
V. Malchow

5.3. Concept of Modernization Works Related to the Capability of Handling E Class Container Vessels in the Port Gdynia
K. Formela & A. Kazimierczak

5.4. Container Transport Capacity at the Port of Koper, Including a Brief Description of Studies Necessary Prior to Expansion
A. Perkovic, E. Tordy, M. Batis & L. Gucma

Chapter 6. Intermodal Transport

6.1. Overview of Intermodal Liner Passenger Connections within Croatian Seaports
V. Stupalo, N. Jolic & M. Bukljas Skocibusic

6.2. Concept of Cargo Security Assurance in an Intermodal Transportation
T. Egnimas, S. Jakovlev, A. Bogdanciuc, R. Didziokas & T. Lanczukas

Chapter 7. Propulsion and Mechanical Engineering

7.1. Diagnostic and Measurement System for Marine Engines
A. Charalabhis

7.2. Develop a Condition Based Maintenance Model for a Vessel’s Main Propulsion System and Related Subsystems
M. Anantharaman & N. Lawrence

7.3. Experimental Analysis of Pedestal Propulsion on Naval Vessel
M.P. Abdul Ghani, O. Yaakob, N. Ismail & A.S.A. Kader, A.F. Ahmad Sabli & P. Singaraveloo

7.4. Modern Methods of the Selection of Diesel Engines Injector Nozzles Parameters
M. Idzior

7.5. The Assessment of the Application of the CFD Package OpenFOAM to Simulating Flow Around the Propeller
T. Gornicz & J. Kulczyk

7.6. On the Characteristics of the Propulsion Performance in the Actual Sea
J. Kayuno, H. Yabuki, N. Sasaki & R. Hiwatashi

7.7. Engine Room Simulator (ERS) Training Course: Practicability and Essentiality Onboard Ship
R.A. Alimen

7.8. Contribution to Treatment System Deformed Highlighted a Network Connection Point of Medium and High Voltage
V. Cicic

Chapter 8. Hydrodynamics and Ship Stability

S. Matveenko, E. Meyler & O. Tanayev

8.2. The Values and Locations of the Hydrostatic and Hydrodynamic Forces at Hull of the Ship in Transitional Mode
O.O. Kanifolskyi

8.3. Contrary Hydrodynamical Interactions Between the Model and Prototype of Boats
A. Salci

8.4. New Methods of Measuring the Motion (6DOF) and Deformation of Container Vessels in the Sea
D. Kowalewski, F. Heinen & R. Galas

8.5. Hybrid Bayesian Wave Estimation
T. Ieki, M. Baba & K. Hirota

8.6. Modelling Studies of the Roll Stability
W. Misztal & A. Pieniazek

8.7. The Dynamic Heeling Moment of Seagoing Vessels
P. Rezae, J. Jachowski, W. Wawrzyniak

8.8. Safety Studies for Laker Bulker
G. Maciorowski

Author index
8.5. Hybrid Bayesian Wave Estimation for Actual Merchant Vessels
T. Iseki, M. Baida & K. Hiroyama

293

8.6. Modelling Studies of the Roll and the Pitch Training Ship
W. Mironick & A. Pawlczko

299

8.7. The Dynamic Heeling Moment Due to Liquid Sloshing in Partly Filled Wing Tanks for Varying Rolling Period
of Seagoing Vessels
P. Krata, J. Jachowski, W. Wawrzynski & W. Wieczorek

303

8.8. Safety Studies for Laker Bulker Trans-pacific Delivery Voyage
G. Mazerski

311
