|--|-----|
| <i>Preface</i> | ix |
| <i>About the authors</i> | x |
| 1 Introduction | 1 |
| MATTHIAS HEYMANN, GABRIELE GRAMELSBERGER AND MARTIN MAHONY | |
| 2 Key characteristics of cultures of prediction | 18 |
| MATTHIAS HEYMANN, GABRIELE GRAMELSBERGER AND MARTIN MAHONY | |
| PART I | |
| Junctions: Science and politics of prediction | 43 |
| 3 Calculating the weather: Emerging cultures of prediction in late nineteenth- and early twentieth-century Europe | 45 |
| GABRIELE GRAMELSBERGER | |
| 4 Which design for a weather predictor? Speculating on the future of electronic forecasting in post-war America | 68 |
| CHRISTOPH ROSOL | |
| 5 A new climate Hubert H. Lamb and boundary work at the UK Meteorological Office | 85 |
| JANET MARTIN-NIELSEN | |
| 6 From heuristic to predictive: Making climate models into political instruments | 100 |
| MATTHIAS HEYMANN AND NILS RANDEV HUNDEBOL | |
| 7 How to develop climate models? The "gamble" of improving climate model parameterizations | 120 |
| HÉLÈNE GUILLEMOT | |

PART II

| | |
|--|-----|
| Challenges and debates: Negotiating and using simulation knowledge | 137 |
| 8 The (re)emergence of regional climate: Mobile models, regional visions and the government of climate change | 139 |
| MARTIN MAHONY | |
| 9 Bellwether, exceptionalism, and other tropes: Political coproduction of arctic climate modeling | 159 |
| NINA WORMBS, RALF DÖSCHER, ANNIKA E. NILSSON AND SVERKER SÖRLIN | |
| 10 From predictive to instructive: Using models for geoengineering | 178 |
| JOHANN FEICHTER AND MARKUS QUANTE | |
| 11 Validating models in the face of uncertainty: Geotechnical engineering and dike vulnerability in the Netherlands | 195 |
| MATTHIJS KOUW | |
| 12 Tracing uncertainty management through four IPCC Assessment Reports and beyond | 214 |
| CATHARINA LANDSTRÖM | |
| 13 The future face of the Earth: The visual semantics of the future in the climate change imagery of the IPCC | 231 |
| BIRGIT SCHNEIDER | |
| <i>Index</i> | 253 |
