

# Contents

Preface to the Second Edition .....	xix
Preface to the First Edition .....	xxi
Acknowledgments.....	xxiii
Author .....	xxv
List of Abbreviations.....	xxvii
Introduction.....	xxxii
<b>Chapter 1</b> The Global Spatial Data Model (GSDM) Defined.....	1
Introduction .....	1
The GSDM .....	2
Functional Model Component.....	3
Computational Designations .....	5
Algorithm for Functional Model .....	10
Stochastic Model Component.....	14
The GSDM Covariance Matrices .....	14
The GSDM 3-D Inverse.....	16
BURKORD™: Software and Database.....	18
Summary .....	18
References .....	19
<b>Chapter 2</b> Featuring the 3-D Global Spatial Data Model.....	21
Introduction .....	21
The GSDM Facilitates Existing Initiatives.....	22
U.S. National Academy of Public Administration Reports .....	22
National Oceanic and Atmospheric Administration .....	23
Coalition of Geospatial Organizations .....	24
Other Applications.....	25
Dynamic Environments .....	25
Static Environments.....	25
Information Provided by the GSDM.....	26
Summary .....	26
References .....	27
<b>Chapter 3</b> Spatial Data and the Science of Measurement.....	29
Introduction .....	29
Spatial Data Defined.....	29
Coordinate Systems Give Meaning to Spatial Data .....	30
Spatial Data Types .....	32

Spatial Data Visualization Is Well Defined .....	34
Direct and Indirect Measurements Contain Uncertainty .....	34
Fundamental Physical Constants Are Held Exact .....	34
Measurements/Observations Contain Errors .....	35
Measurements Used to Create Spatial Data .....	35
Taping .....	35
Leveling .....	35
EDMI .....	35
Angles .....	36
GPS and GNSS .....	36
Remote Sensing .....	38
Photogrammetry .....	38
LiDAR .....	38
Logistics .....	38
Errorless Spatial Data .....	39
Sources of Primary Spatial Data .....	41
Observations and Measurements .....	41
Errorless Quantities .....	42
Derived Spatial Data Are Computed from Primary Spatial Data .....	42
Establishing and Preserving the Value of Spatial Data .....	43
Summary .....	44
References .....	44
<b>Chapter 4 Summary of Mathematical Concepts .....</b>	<b>47</b>
Introduction .....	47
Conventions .....	48
Numbers .....	48
Fractions .....	48
Decimal .....	48
Radian .....	49
Sexagesimal .....	50
Binary .....	50
Unit Conversions .....	51
Coordinate Systems .....	51
Significant Digits .....	52
Addition and Subtraction .....	52
Multiplication and Division .....	53
Avoid Mistakes by Working with Coordinate Differences .....	54
Logic .....	54
Arithmetic .....	55
Algebra .....	55
Axioms of Equality (for Real Numbers $A$ , $B$ , and $C$ ) .....	56
Axioms of Addition (for Real Numbers $A$ , $B$ , and $C$ ) .....	56
Axioms of Multiplication (for Real Numbers $A$ , $B$ , and $C$ ) .....	56
Boolean Algebra .....	56

Geometry .....	56
Point .....	57
Distance .....	57
Dimension .....	57
Line .....	57
Plane .....	57
Angle .....	58
Circle .....	58
Ellipse .....	58
Triangle .....	58
Quadrilateral .....	58
Rectangle .....	59
Square .....	59
Trapezoid .....	59
Parallelogram .....	59
Polygon .....	59
Pythagorean Theorem .....	59
Solid Geometry .....	60
Sphere .....	60
Ellipsoid .....	60
Cube .....	60
Polyhedron .....	60
Tetrahedron .....	60
Pyramid .....	60
Equation of a Plane in Space .....	60
Equation of a Sphere in Space .....	61
Equation of an Ellipsoid Centered on the Origin .....	61
Conic Sections .....	61
Vectors .....	62
Trigonometry .....	62
Trigonometric Identities .....	63
Law of Sines .....	64
Law of Cosines .....	65
Spherical Trigonometry .....	65
Calculus .....	68
Example .....	68
Differential Calculus Equations .....	70
Integral Calculus Equations .....	70
Probability and Statistics .....	71
Introduction .....	71
Standard Deviation .....	72
Measurement .....	73
Errors .....	73
Blunders .....	74
Systematic Errors .....	74
Random Errors .....	74

Error Sources .....	74
Personal.....	74
Environmental.....	75
Instrumental.....	75
Accuracy and Precision .....	75
Computing Standard Deviations.....	76
Standard Deviation of the Mean.....	76
Confidence Intervals.....	77
Hypothesis Testing .....	78
Matrix Algebra.....	79
Models .....	80
Functional.....	80
Stochastic.....	80
Error Propagation .....	81
Error Ellipses.....	87
Least Squares.....	88
Linearization.....	89
Procedure for Nonlinear Solution.....	90
Applications to the GSDM.....	90
References .....	91
<b>Chapter 5 Geometrical Models for Spatial Data Computations .....</b>	<b>93</b>
Introduction .....	93
Conventions .....	94
Two-Dimensional Cartesian Models.....	97
Math/Science Reference System .....	98
Engineering/Surveying Reference System.....	98
Coordinate Geometry .....	99
Forward.....	99
Inverse.....	100
Intersections.....	100
Line-Line (One Solution or No Solution If Lines Are Parallel)....	102
Line-Circle (May Have Two Solutions, One Solution, or No Solution).....	102
Circle-Circle (May Have Two Solutions, One Solution, or No Solution).....	103
Perpendicular Offset.....	104
Area by Coordinates .....	104
Circular Curves.....	106
Definitions .....	106
Degree of Curve.....	106
Elements and Equations .....	107
Stationing.....	109
Metric Considerations .....	110
