<i>Introduction: Toward Healthy Neighborhoods</i>	1
<b>Principle 1. Importance: Assess how health matters in this place</b>	29
Proposition 1: Figure out if there are good reasons for considering health	34
Proposition 2: Identify an initial list of neighborhood-relevant health issues	40
Proposition 3: Figure out if anyone else cares	44
<b>Principle 2. Balance: Make healthier places by balancing physical changes with other interventions to appeal to different kinds of people</b>	51
Proposition 4: Understand that trade-offs are inherent in planning for health at all scales and this is true of neighborhoods as well	58
Proposition 5: Appreciate that there is no ideal size for a healthy community, but different dimensions of health relate to different scales	64
<b>Principle 3. Vulnerability: Plan and design for those with the most health vulnerabilities and fewest resources for making healthy choices</b>	69
Proposition 6: Create a variety of housing options to promote housing choices within the neighborhood	74
Proposition 7: Integrate universal design principles into neighborhood planning and design	82
Proposition 8: Increase choice, access, and exposure to high-quality, diverse, and healthy food options, especially in low-income areas	88
<b>Principle 4. Layout: Foster multiple dimensions of health through overall neighborhood layout</b>	95
Proposition 9: Create mixed use neighborhoods with a balance of activities that support good health	100
Proposition 10: Provide enough density of population to support services for a healthy lifestyle	106
Proposition 11: Create a connected, “healthier” travel circulation pattern for pedestrians, bicyclists, and transit users—the vehicular pattern can be different	112
Proposition 12: Increase access to a variety of locally relevant recreational facilities and green spaces	120

<b>Principle 5. Access: Provide options for getting around and increasing geographic access</b>	127
Proposition 13: Coordinate land-use planning and urban design with transit to increase efficiency, access, and mobility	136
Proposition 14: Adopt policies and planning practices to create safe neighborhood transportation options for all types of road users	141
Proposition 15: Ensure adequate pedestrian and cyclist infrastructure and amenities	145
<b>Principle 6. Connection: Create opportunities for people to interact with each other in positive ways</b>	151
Proposition 16: Create publicly accessible neighborhood spaces, programs, and events to support healthy interactions and behaviors	158
Proposition 17: Design the public realm to reduce street crime and fear of crime	162
<b>Principle 7. Protection: Reduce harmful exposures at a neighborhood level through a combination of wider policies and regulations along with local actions</b>	169
Proposition 18: Reduce pollutants and chemicals at the source and separate people from toxins through buffers, technology, or design	174
Proposition 19: Separate people and infrastructure from areas vulnerable to natural disasters and build in resilience through technology or design	182
Proposition 20: Reduce unwanted local noise exposure at the source, and separate people from noise through buffers, technology, or design	186
<b>Principle 8. Implementation: Coordinate diverse actions over time</b>	193
<b>Conclusion</b>	203
