1	Introduction	1
1.1	Motivation	1
1.2	Problem Statement	1
1.3	Organization of the Monograph	2
2	Background	5
2.1	Basic Adaptive Filter Models	5
2.2	Adaptive Filter Models	5
2.2.1	System Identification	6
2.2.2	Channel Equalization	7
2.3	Existing Work on Partial Update Adaptive Filters	9
2.4	Basic Partial Update Methods	10
2.4.1	Periodic Partial Update Method	10
2.4.2	Sequential Partial Update Method	11
2.4.3	Stochastic Partial Update Method	11
2.4.4	MMax Method	11
3	Partial Update CMA-based Algorithms for Adaptive Filtering	13
3.1	Motivation	13
3.2	Review of Constant Modulus Algorithms	13
3.3	Partial Update Constant Modulus Algorithms	15
3.3.1	Partial Update CMA	15
3.3.2	Partial Update NCMA	16
3.3.3	Partial Update LSCMA	16
3.4	Algorithm Analysis for a Time-Invariant System	17
3.4.1	Steady-State Performance of Partial Update SDCMA	17
3.4.2	Steady-State Performance of Partial Update Dynamic LSCMA	20
3.4.3	Complexity of the PU SDCMA and LSCMA	22
3.5	Simulation – A Simple FIR Channel	26

3.5.1	Convergence Performance	27
3.5.2	Steady-State Performance	27
3.5.3	Complexity	33
3.6	Algorithm Analysis for a Time-Varying System	35
3.6.1	Algorithm Analysis of CMA1-2 and NCMA for a Time-Varying System	35
3.6.2	Algorithm Analysis of LSCMA for a Time-Varying System	36
3.6.3	Simulation	37
3.7	Conclusion	43
4	Partial-Update CG Algorithms for Adaptive Filtering	47
4.1	Review of Conjugate Gradient Algorithm	47
4.2	Partial-Update CG	48
4.3	Steady-State Performance of Partial-Update CG for a Time-Invariant System	49
4.4	Steady-State Performance of Partial-Update CG for a Time-Varying System	52
4.5	Simulations	54
4.5.1	Performance of Different PU CG Algorithms	54
4.5.2	Tracking Performance of the PU CG Using the First-Order Markov Model	59
4.6	Conclusion	66
5	Partial-Update EDS Algorithms for Adaptive Filtering	67
5.1	Motivation	67
5.2	Review of Euclidean Direction Search Algorithm	67
5.3	Partial update EDS	68
5.4	Performance of the Partial-Update EDS in a Time-Invariant System	70
5.5	Performance of the Partial-Update EDS in a Time-Varying System	72
5.6	Simulations	73
5.6.1	Performance of the PU EDS in a Time-Invariant System	73
5.6.2	Tracking performance of the PU EDS Using the First-Order Markov Model	77
5.6.3	Performance Comparison of the PU EDS with EDS, PU RLS, RLS, PU CG, and CG	80
5.7	Conclusion	84

6	Special Applications of Partial-Update Adaptive Filters	85
6.1	Application in Detecting GSM Signals in a Local GSM System	85
6.2	Application in Image Compression and Classification	89
6.2.1	Simulations	93
6.3	Conclusion	97
