## Chapter 1: Research on Building Engineering and Building Materials

<table>
<thead>
<tr>
<th>Study</th>
<th>Authors</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Study on Experiment of the Wire Rope Composite Anchoring</td>
<td>X.G. Cui, X.Y. Tong and Z. Dou</td>
<td>9</td>
</tr>
<tr>
<td>Research on Color Design in Reconstruction of Architectures Alongside Streets Based on Building Materials</td>
<td>Y.L. Li and X.Y. Wang</td>
<td>13</td>
</tr>
<tr>
<td>Study on Hydrogeological Investigation and Water Preventing and Draining Technology of Zhongtiao Shan Tunnel</td>
<td>X.H. Xue, Z.M. Su and F. Song</td>
<td>17</td>
</tr>
<tr>
<td>Soil Nailing Optimization Design of Foundation Pit Based on Response Surface of SVM Technology</td>
<td>T. Liu, J. Cao, H.M. Liu and H.M. Zhao</td>
<td>27</td>
</tr>
<tr>
<td>Research on Construction Materials with the Elderly Residence Planning and Design Based on Home Care of the Elderly</td>
<td>J. Li</td>
<td>31</td>
</tr>
<tr>
<td>Study on Bridge Pile Load Test Status and Existing Problems</td>
<td>X.F. Zhang, Q.N. Li and Y. Ma</td>
<td>35</td>
</tr>
<tr>
<td>Behavior of High-Strength Concrete-Filled FRP Tube Columns under Simulated Seismic Loading: An-Experimental Study</td>
<td>Y. Idris and T. Ozbakkaloglu</td>
<td>39</td>
</tr>
<tr>
<td>A Simple Design-Oriented Model for FRP-Confined High-Strength Concrete</td>
<td>J.C. Lim and T. Ozbakkaloglu</td>
<td>45</td>
</tr>
<tr>
<td>Study on Significant Engineering Construction Projects with Building Materials Based on Social Stability Risk Assessment</td>
<td>Q. Shi and Y. Liu</td>
<td>50</td>
</tr>
<tr>
<td>Research on Application of Iron Tailings on Road Base</td>
<td>S. Xu</td>
<td>54</td>
</tr>
<tr>
<td>Glass-Fibre-Concrete Applied for Building Facade Panels Subjected to Wind Loading Actions</td>
<td>M. Karmazinová and J. Melcher</td>
<td>58</td>
</tr>
<tr>
<td>Seismic Vulnerability Assessment of Existing Precast Industrial Buildings</td>
<td>M. Valente</td>
<td>63</td>
</tr>
<tr>
<td>Chapter 2: Structures Engineering</td>
<td></td>
<td></td>
</tr>
<tr>
<td>----------------------------------</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Vertical Motive Performance Test of the Rigid Hinge Expansion Joint of Jiashao Bridge</td>
<td>Y. Zhao and T.B. Peng</td>
<td>110</td>
</tr>
<tr>
<td>Study Finite Element Analysis of Monopile Foundation Based on Mechanical Mechanics and Properties of Steel Structure for Offshore Wind Turbines</td>
<td>B.X. Mei</td>
<td>114</td>
</tr>
<tr>
<td>Numerical Studies on Friction Stir Welding of Lightweight Materials</td>
<td>X.C. He</td>
<td>118</td>
</tr>
<tr>
<td>Dissipative Knee Bracing for Seismic Strengthening of Steel Frames</td>
<td>M. Valente</td>
<td>123</td>
</tr>
<tr>
<td>Study on Dynamic Second-Order Effects of SDOF System under Vertical Earthquake Loading</td>
<td>F.X. Han and J. Yu</td>
<td>128</td>
</tr>
<tr>
<td>Study on Seismic Behavior of Joints Composed of Engineering Material of Concrete Filled Steel Tube</td>
<td>X.W. Zhang and Q.Y. Shi</td>
<td>132</td>
</tr>
</tbody>
</table>
FEM Analysis of Bi-Prestressed Concrete Beam
F. Gao and T. Liu.................................................................138

Structure Analysis of Large Steel Crude Oil Tank under the Planar
Inclined Foundation
L.X. Wei, X.Y. Li and D.W. Ji ..................................................142

Experimental Investigation on Composite Seismic Isolation System
X.Z. Dang, H.L. Yang, W.C. Yuan and D.Q. Song........................146

Design and Construction of Plot 0 Wide-Span Cantilever Beam Support
Z. Li and N.H. He .................................................................150

A Self-Centering Seismic Design for Bridge with Pile-Cap Foundation
H.L. Yang, X.Z. Dang, W.C. Yuan and D.Q. Song......................155

Brief Introduction of Structural Design for Lijiang Sports Center Stadium
W.Q. Xu, J.X. Song and W. Pan ..............................................159

Steel and Steel-Concrete Composite Columns of HEA-Cross-Sections with Member
Imperfections, Subjected to Buckling Compression
M. Karmazinová.................................................................164

Thin-Walled Cold-Formed Steel Beams with Holes in Lateral
Flexural-Torsional Buckling
M. Karmazinová, J. Melcher and M. Horáček ............................170

Chapter 3: Research on Applied Materials

Preparation of ZnFe2O4 Nanometer Powders by Sol-Gel Method and Research
about its Electrochemical Performance
Y.L. Wu, Q.H. Wang, L. Wang and H.Y. Zhao ................................179

Functional Modification and Preparation of Superparamagnetic Fe3O4
X.F. Sun and Y.J. Li ...............................................................183

Study on Test Materials with the Relationship between Growth and Development
Characteristics and Temperature and Relative Humidity of Jacaranda mimosaefolia
Y. Sun, F. Li and J.A. Shi ......................................................189

Study of Waste Rigid Polyurethane Plastic Foam Insulation Recycling and Recovery

Research on Preparing Recycling Boards by Using Non-Metallic Materials of
Obsolete Printed Circuit Boards

Experimental Study on the Influence of the Self-Healing Microcapsules on the
Friction Noise Performance of Composite Gears Based on Properties of
Mechanical Materials
L. Zhang and Y.M. Ma ..........................................................203

Parameter Optimization by Taguchi Method for Thermoplastic Polymer Using a
Melt Spinning Machine
S.W. Wang and T.L. Su ........................................................208

Improving the Biodegradability of Polyactic Acid at Alcaligenes Faecalis and
Staphylococcus Aureus Using the Optimization Method
S.W. Wang and T.L. Su ........................................................213
Structure and Properties of CNT-PbO₂ Anodes on Stainless Steel
Y.H. Song and L.J. Ma ................................................................. 218

Research on Gelatinization Process of Starch
X.L. Chen and Q.N. Shi ............................................................... 223

Research on Roll Welding Process of Cu/Al Composite Plates
X.L. Chen and Q.N. Shi ............................................................... 227

Effects of Inner Corner Angle on Strain Distribution of ECAPed Aluminum Alloy
X.L. Chen and Q.N. Shi ............................................................... 231

Chapter 4: Related Topics

Single Micro Pile in Debris Landslide Anti-Sliding Mechanism Model Test Research
Q. Cai, J.M. Kong and Y. Zhang ...................................................... 237

Numerical Simulation of Soil-Pipe-Fluid Interaction in Buried Liquid-Conveying Pipe
M. Yang, X. Liu and Y.H. Chen ....................................................... 244

The Block Spring Model for Seepage Slope Stability Analysis
J. Ma, W.S. Chen and Z. Li .......................................................... 249

NO₂-Sensing Characteristics of Sensor with ZnFe₂O₄ Sensing Electrode
Y.L. Wu, H.Y. Zhao, Q.H. Wang and L. Wang .................................. 253

Study on Mine Materials with Exploring for Future Development Direction of Resources Crisis on Mines
Y.X. Bao ..................................................................................... 257

Keyword Index .............................................................................. 261
Author Index ................................................................................ 265
