Committees and Sponsors vii

PART 1

Chapter 1: Architecture and Landscape Design, Residential, Regional and Urban Planning, Sustainable City and Ecological Planning

Analysis of Yi People Ancient Town Spatial Form
W. Wang, A.G. Wang, Y.L. Zhang and Q. Li .................................................. 3

Curriculum Innovation Integration of Digital Technology and Architecture
F.D. Yu ........................................................................................................ 7

Discussion of Cities Construction Shape in Urbanization
S. Wang ...................................................................................................... 11

Discussion on Architectural Design of Green Theatres in China
X.R. Chen and Z. Tao .................................................................................. 15

Highway Landscape Aesthetic Experience: Perception Principle and Psychological Process
X.C. Qin, Y. Shen, S.G. Shao and D. Wang ..................................................... 21

Land Conservation Strategies for Construction Design - Taking Sports Center of Zhaoqing High-Tech Zone as an Example
J. Guo, Z.J. Chen and Z. Tao ..................................................................... 27

Modal Variation Regularity of Inner-Decaying Villages in the Process of Urbanization in China
X.D. Xu, D.F. Wang, H.X. Zhang and M. Xu .................................................. 33

Preserving the Historical Memory of Honolulu’s Chinatown
S. Jin, H.B. Huang and X. Geng .................................................................. 41

Protection Suggestion and Analysis of Present Situation of Pre-Qing Architectural Heritage in China’s Liaoning Province
X.Y. Wang, R. Wang, X.H. Wang and J. Jiang .............................................. 45

Research for Aesthetic and Visual Quality Management in Highway Landscape
D. Wang, Y. Shen, Q. Meng, X.C. Qin and C. Wang .................................... 49

Research on Guangxi Mountainous Villages and Residents Building under the Principles of Sustainable
Y. Pang, S.L. Liao and W.B. Sun .................................................................. 53

Research on Large Eaves’ Shading Effect Based on Parametric Design Platform
Z.P. Zhang, J. Shen and L.H. Zhao ................................................................. 57

Research on Protection Strategy for Architectural Heritage Area of pre-Qing Dynasty in China’s Liaoning Province
X.Y. Wang, R. Wang, J.H. Xu and J. Jiang ...................................................... 63

H.X. Guo and M.R. Deng ............................................................................. 67

Research on the Development of Minority Residential Building – Taking Dai Nationality Buildings in Yunnan Province as an Example
S.T. Li and K. Zhou ...................................................................................... 73

</table>
The Analysis on the Development of Green Architecture in Linyi City
Z.X. Yuan ................................................. 176
The Application Practice of Green Building Technologies in Landscape Design
X.S. Fang, Y.Y. Liang and Z.Y. Song ............................................. 180
Eco-Renovation of the Existing Rural Housing in Yimeng Mountain Area
X.M. Li, Q.D. Li, H.J. Liu and X.D. Xu ............................................. 186
First Exploration of Disaster Prevention and Mitigation Planning of Small Towns
H.Y. Dai, J.H. Ji, B. Guo and L. Zhao ............................................. 190
Study on the Montgomery County Farmland Preservation Program and its Enlightenment for China
L.M. Tang and M.T. Liu ................................................. 194
Systems Engineering Problems Related to Slope Ecological Protection Engineering
Y.S. Yang, Z.Y. Xia, S. Zhou, H. Xiao, B. Wu and W.N. Xu ............................................. 199
The Evolution Research of Urban Morphology of the Changbai Mountains Surrounding Cities -
Illustrated by the Case of Four Typical Cities in Jilin Province
J. Lv and W.J. Chen ................................................. 204
The Study on Feedback Response of Urban Land Use
N.Z. Wu, Y.F. Ho and C.L. Wu ................................................. 209
Space Satisfaction Evaluation on Station Domain of APM Line in Guangzhou Zhujiang
New Town
G.N. Wu, R.B. Huang, Y.F. Zhang and D. Chen ............................................. 214
The Thinking about Sewage Ecological Management of Villages and Small Towns in the Dianchi
Lake Basin
B.F. Xu, G.J. Wu, Y. Feng and L. Lu ............................................. 223
Inner Mongolia Grassland Nomadic Living Space of Modular Theory
M. Ma, Y. Li, J. Kong, J. Wang, M. Zhang, W.M. Wang, H. Su, L. Qiu, J. Kang and W. Chen ............................................. 227
On Re-Understanding of Waste Landscape
W. Di ................................................. 231
Conceiving of Harbin’s Ecologic Residential Quarters’ Water Environment
Y. Pang and Y.X. Wang ................................................. 234
Contemporary Issues and Strategies for Industrial Heritage, Site Reclamation and Landscape Regeneration
M. Gao and S. Liang ................................................. 238

Chapter 2: Environmental Energy, Protection, Technologies and Engineering, Emission Control
Risk Analysis of Regional Energy Efficiency in China Based on DEA
S.L. Liu and Y.M. Wang ................................................. 245
Technologies for Reusing Resources in Abandoned Oilfield after Tertiary Oil Recovery
X.J. Shao, Y.Y. Kang, C.F. Wang, E.S. Gao, X.H. Che, Z.S. Huang and X.X. Dong ............................................. 249
Optimization of Capacitive Deionization for Salt Removal from Water with Response Surface Methodology
Risk Analysis on Downstream of a Reservoir when the Flood Control Forecast Operation Method is Used - An Example of Shenwo Reservoir
S.H. Dong, Y.K. Zhao and Y.H. Lin ................................................. 261
Research on Pollutant Loading of Biological Aerated Filter
J. Wang and X.M. Hu ................................................. 265
Research on Adsorption of Cu\textsuperscript{2+} in Wastewater by Carbonaceous Adsorbent Made by Sludge
J.C. Gu, Z.L. Mei, C.M. Wei, H.Y. Wang, W.J. Lin and C.L. Dou................................. 269

An Analysis of Economic and Environmental Impact of Sewage Treatment in Beijing City

Comparison of the Aquatic Plants' Purification Effects on Eutrophic Water from Chaohu
Lake Area
F.Q. Ji and W. Wang.................................................. 282

Study on the Ecological Characteristics of the Seaweed House in Jiaodong Peninsula
F.C. Kuang and X. Yu.................................................. 286

A Study on Environmental Attitude, Environmental Behavior and Environmental Issues of Living
Place: The Questionnaire Survey for some Dwellers in Shenzhen
X.Y. Wu and W.J. Lu.................................................. 290

Low Impact Development (LID) Approaches in Sustainable Stormwater Management
C.X. Wang.............................................................. 297

The Study of Water-Sediment Two Phase Flow Field Measurement Based on Particle
Image Velocimetry
B. Chen.............................................................. 302

Correlation Analysis on Water Resources Utilization and the Sustainable Development of Social
Economy in Minqin of Gansu Province
J.M. Han and R.Z. Zhang........................................... 311

Study on Structure Optimization of the Allocation of Water Resources of Minqin Based on
Goal Programming
J.M. Han and R.Z. Zhang........................................... 318

A Study of the Creativity Competition of the International College Student Charity Advertising
Festival for Environmental Protection
R.L. Lin.............................................................. 328

Optimization of the Cultivable Conditions of Yeast YG28 in Monosodium Glutamate
Waste Water
C.M. Ge, S.G. Shen, J.L. Chen and J. Zhang................................................. 332

The Research of Rainfall Error Correction Based on System Response Curve
W. Si, W.M. Bao, H.Y. Wang and S.M. Qu............................................. 335

Geological Environment Suitability Evaluation and Function Regionalization in Zhongyuan
Urban Agglomeration
Y.R. Chen and C.M. Ma................................................ 340

Monitoring of Electrical Parameters into Island Grid Integrating Renewable Energy Sources
A. Oprea, F. Dragomir, O.E. Dragomir, N. Olariu and L. Olteanu.............................. 346

Water Quality Evaluation of a Pumped-Storage Reservoir in Ningxia, China
L.X. Zheng and C.G. Li................................................ 350

The Applicable Technical Analysis of the Small Towns Domestic Sewage Treatment in
Yunnan Province
D.H. Liang, B.F. Xu and X. Wang........................................ 356

Study on Development of Circular Economy in Resource-Based City
R. Li and X. Gong.................................................... 360

Analysis of Water Heat Pollution of Thermal Discharge in Surface Water Source Heat
Pump System
M. Wang and Y.J. Yu............................................... 364

Study on Poyang Lake Tourism Plan under the Low-Carbon Ecology
L. Qing.............................................................. 369

Research on the Key Technology of Vegetation Roofing Energy Saving
X.F. Bao.............................................................. 375

Indication of Magi
Areas of Southern
C.Q. Wu, X.Y. Wu, X.Y. Xing................................. 269

Relationship between
T.H. Huang, A.R. Huang...................... 275

Comprehensive Case
Y. Xia, C.M. Ma...................... 282

Study on the Renewal
X.G. Zhao, X.C. Zhang...................... 286

Research and Design
L.X. Shang, C.Y. Yan...................... 290

Balancing Growth
S. Jia, H.B. Huang...................... 297

Study on Spatial Development
X. Xu...................... 302

Circular Economy
X.X. Bu and H.M. Zhou...................... 311

Comparison of Coal
Oystershell Local
Z.Y. Wang and W. Wang...................... 318

Design Study of the
Principle of Environment
Y. Wang, Z.K. Liu...................... 328

Human Resident Area
X.F. Bao...................... 332

Implementation of
E.T. Viana, L.C. Lian...................... 335

Industrialized Production
Y.C. Chao and W. Wang...................... 340

Life Cycle Assessment
Y.G. Zhao and J.X. Zhang...................... 345

Methodology of M.S.
University Campus
Y. Su and J.W. Y...... 350

Strategy on Architectural
Reduction Policy-1
M.J. Lu and G.X. Chen...................... 355

Study on Scheme
M.X. Cui and L. Xue...................... 360

The Ecological Strategy
J. Xu and J.P. Liu...................... 365

Visitor Experience
Zengcheng, Guangzhou
J.Y. Wu and J.X. Yan...................... 370

Analysis on Optimization
District Planning
S.Q. Yang and M.X. Cui...................... 375

Assessment of Heavy
through Changsha
F.T. Wu, H.Y. Zhao

Z.X. Zheng and C.G. Li

The Applicable Technical Analysis of the Small Towns Domestic Sewage Treatment in
Yunnan Province
D.H. Liang, B.F. Xu and X. Wang

Study on Development of Circular Economy in Resource-Based City
R. Li and X. Gong

Analysis of Water Heat Pollution of Thermal Discharge in Surface Water Source Heat
Pump System
M. Wang and Y.J. Yu

Study on Poyang Lake Tourism Plan under the Low-Carbon Ecology
L. Qing

Research on the Key Technology of Vegetation Roofing Energy Saving
X.F. Bao
Indication of Magnetic Susceptibility to Heavy Metal Pollution in the Typical Contaminated Areas of Southern Jiangsu Province
C.Q. Wu, X.Y. Yuan, T.Y. Li, X.Q. Zhao and Q.L. Liao .......................................................... 380

Relationship between Chinese WeiHai Urbanization and Climate Change

Comprehensive Carrying Capacity Assessment of Water Environment in Zhengzhou City
Y. Xia, C.M. Ma, X.J. Liu, X.Y. Liu and Q.L. Deng ................................................................. 390

Study on the Renewable Toxic Gas Filtering Apparatus
X.G. Zhao, X.X. Xu, N. Fu, W.C. Zhang, W.H. Su, X.D. Ren and X.D. Cui ..................................... 396

Research and Design of Energy-Saving and Environmental-Protection Full Evaporative Air Cooler
L.X. Shang, C.Y. Zhou and Y.T. Jing .......................................................................................... 400

Balancing Growth and Preservation: Protection and Management of Nanxun Historic Water Town
S. Jin, H.B. Huang and K. Liu ...................................................................................................... 411

Study on Spatial Distribution of Surface Water Resources in Lhasa Based on RS and GIS
X. Xu ......................................................................................................................................... 417

Circular Economy - An Effective Way of Construction of Ecological Civilization
X.X. Bu and H.M. Li .................................................................................................................... 421

Comparison of Coastal Green Dwellings' Ecological Strategy Take Seaweed House and Oystershell Loculus for Example
Z.Y. Wang and W. Tong ............................................................................................................... 425

Design Study of the Multifunctional Container for Easy Portability and Assembly - Base on the Principle of Environmental Adaptability
Y. Wang, Z.K. Lei and X.Y. Hu ................................................................................................. 430

Human Resident Acoustical Environment and Acoustical Insulation of Residential Building
X.F. Bao ....................................................................................................................................... 435

Implementation of Environmental Management on a Construction Site

Industrialized Precast Construction Low Carbon Design Control
Y. Wang and H. Zhang ................................................................................................................. 445

Life Cycle Assessment on CO₂ Reduction of Street House Reuse
Y.C. Chao and W.L. Jheng ........................................................................................................... 450

Methodology of Measurement and Calculation of Building Energy Management System in University Campus
Y. Su and J.W. Yan ...................................................................................................................... 454

Strategy on Architectural Specialty Curriculum System Update under Energy Saving Emission Reduction Policy-Oriented
M.J. Lu and G.X. Wang .................................................................................................................. 460

Study on Scheme Optimization of Low Carbon Construction Based on Value Engineering
M.X. Cui and L. Ji ......................................................................................................................... 464

The Ecological Strategies of Residential Buildings in Qinba Mountain Villages
J. Xu and J.P. Liu ........................................................................................................................ 470

Visitor Experience in the River Corridor Greenway: A Study of Zengjiang River Greenway in Zengcheng, Guangzhou
J.Y. Wu and J.X. Xu ..................................................................................................................... 474

Analysis on Optimization Design Strategy for Sunshine Environment in Residential District Planning
S.Q. Yang and M.J. Lu .................................................................................................................... 478

Assessment of Heavy Metal Levels in Sediment of the Xiangjiang River Section Flowing through Changsha
F.T. Wu, H.Y. Zhu, J. Guo and Y.N. Lei ....................................................................................... 482
