## Part I The Role of Radioactivities in Astrophysics

<b>1 Introduction to Astronomy with Radioactivity</b> .....	3
R. Diehl	
1.1 The Origin of Radioactivity .....	3
1.2 The Processes of Radioactivity .....	9
1.3 Radioactivity and Cosmic Nucleosynthesis .....	13
1.4 Observations of Cosmic Radioactive Isotopes .....	17
1.5 The Structure of this Book .....	21
References .....	22
<b>2 The Role of Radioactive Isotopes in Astrophysics</b> .....	25
D.D. Clayton	
2.1 History of Nucleosynthesis and Radioactivity .....	25
2.2 Disciplines of Astronomy with Radioactivity .....	38
References .....	77

## Part II Specific Sources of Cosmic Isotopes

<b>3 Radioactivities in Low- and Intermediate-Mass Stars</b> .....	83
M. Lugaro and A. Chieffi	
3.1 The Missing Element .....	84
3.2 The Production of Radioactive Nuclei in Stellar Interiors .....	84
3.3 Evolution To and Through the First Giant Branch .....	93
3.4 Evolution in the Double Shell Burning Phase .....	103
3.5 Neutron-Capture Nucleosynthesis in AGB Stars .....	116
3.6 Nucleosynthesis of Long-lived Isotopes in AGB Stars .....	132
References .....	144

<b>4</b>	<b>Massive Stars and Their Supernovae</b> .....	153
	F.-K. Thielemann, R. Hirschi, M. Liebendörfer, and R. Diehl	
4.1	Cosmic Significance of Massive Stars .....	153
4.2	Hydrostatic and Explosive Burning in Massive Stars .....	155
4.3	Evolution of Massive Stars up to Core Collapse .....	163
4.4	Supernovae from Massive Stars and the Role of Radioactivity ....	180
4.5	The Aftermath of Explosions .....	202
	References .....	219
<b>5</b>	<b>Binary Systems and Their Nuclear Explosions</b> .....	233
	J. Isern, M. Hernanz, and J. José	
5.1	Accretion onto Compact Objects and Thermonuclear Runaways ..	233
5.2	Classical Novae .....	244
5.3	SN Ia Explosions .....	252
5.4	X-Ray Bursts and Superbursts .....	262
5.5	Observational Diagnostics of Binary-Systems .....	272
5.6	Accretion in Binaries: Special Cases .....	289
	References .....	291

### Part III Special Places to Observe Cosmic Isotopes

<b>6</b>	<b>The Early Solar System</b> .....	309
	M. Busso	
6.1	The Age of the Solar System .....	309
6.2	Short-Lived Radioactive Nuclei in the Early Solar System .....	313
6.3	Expected Conditions in the Early Solar System .....	318
6.4	The Galactic Inheritance .....	323
6.5	Local Production of Radioactive Nuclei .....	325
6.6	Short-Lived Nuclei: In-Situ Production .....	331
6.7	Early Solar System Lessons .....	334
	References .....	336
<b>7</b>	<b>Distributed Radioactivities</b> .....	345
	R. Diehl, D.H. Hartmann, and N. Prantzos	
7.1	The Role of Radioactivities .....	345
7.2	The Milky Way .....	348
7.3	Processes in the Interstellar Medium: Mixing and Feedback .....	358
7.4	$^{26}\text{Al}$ in the Interstellar Medium .....	369
7.5	$^{60}\text{Fe}$ and Massive-Star Structure .....	386
7.6	$^{44}\text{Ti}$ and Galactic Core-Collapse Supernovae .....	389
7.7	Positrons and their Annihilation .....	391

7.8	Radioactivities in Cosmic Rays .....	408
7.9	Cosmic Star Formation and Supernova Rates .....	418
	References .....	423

## Part IV Tools for the Study of Radioactivities in Astrophysics

<b>8</b>	<b>Computer-Modeling of Stars</b> .....	439
	M. Liebendörfer	
8.1	Models of Core-Collapse Supernovae .....	443
8.2	Models of Ejecta for Nucleosynthetic Yield Prediction .....	453
	References .....	456
<b>9</b>	<b>Nuclear Reactions</b> .....	461
	M. Wiescher and T. Rauscher	
9.1	Nuclear Reactions in Astrophysical Environments .....	461
9.2	Relevant Energy Range of Astrophysical Cross Sections .....	468
9.3	Nuclear Reaction Models .....	469
9.4	Experimental Facilities and Techniques .....	474
9.5	Specific Experiments .....	482
	References .....	486
<b>10</b>	<b>Instruments for Observations of Radioactivities</b> .....	491
	G. Kanbach and L. Nittler	
10.1	Astronomical Telescopes .....	491
10.2	Analyzing Material Samples From and Within Meteorites .....	499
10.3	Detection and Analysis of Cosmic Rays .....	507
	References .....	510

## Part V Epilogue

<b>11</b>	<b>Perspectives</b> .....	519
	R. Diehl, D.H. Hartmann, and N. Prantzos	

## Appendices

<b>A</b>	<b>Annotations on Chemical Evolution</b> .....	525
A.1	Chemical Evolution: Analytical Descriptions .....	525
A.2	Complexities in Descriptions of Chemical Evolution .....	529
	References .....	536

<b>B Radionuclides and Their Stellar Origins</b> .....	539
M. Lugaro and A. Chieffi	
References .....	546
<b>C Milestones in the Science of Cosmic Radioactivities</b> .....	549
<b>D Glossary: Key Terms in Astronomy with Radioactivities</b> .....	553
<b>Index</b> .....	559
