

Contents

1	Introduction to Multicriteria Decision Analysis	1
1.1	Decision Analysis	1
1.2	The Components of MCDA Problems	4
1.3	Classification of MCDA Problems	6
1.3.1	Discrete Case	6
1.3.2	Continuous Case	8
2	The Hierarchy of the Criteria	13
2.1	Introduction	13
2.2	Criteria	14
2.2.1	Social Criteria	14
2.2.2	Economic Criteria	15
2.2.3	Environmental Criteria	16
2.3	Constructing the Hierarchy of the Criteria	16
2.3.1	Value Management	17
2.3.2	Case Study	18
3	Solution of Discrete MCDA Problems	21
3.1	Introduction	21
3.2	Dominance Method	22
3.3	Sequential Optimization (SO)	24
3.4	The ϵ -Constraint Method (ϵ CM)	25
3.5	Simple Additive Weighting (SAW)	26
3.6	Distance Based Methods (DBM)	29
3.7	The Analytic Hierarchy Process (AHP)	33
3.8	Other Methods	39

3.9	Case Studies.....	40
3.9.1	Inter-basin Water Transfer.....	40
3.9.2	Urban Water Management.....	45
3.10	Discussions.....	48
4	Solution of Continuous MCDA Problems	51
4.1	Introduction.....	51
4.2	Dominance Method	51
4.3	Sequential Optimization.....	54
4.4	The ϵ -Constraint Method.....	56
4.5	Simple Additive Weighting.....	58
4.6	Distance Based Methods	61
4.7	Other Methods.....	63
4.8	Case Studies	63
4.8.1	Water Allocation Problem	63
4.8.2	Groundwater Quality Management	71
4.9	Discussions	76
5	Social Choice Methods	77
5.1	Introduction.....	77
5.2	Social Choice Methods.....	78
5.2.1	Plurality Voting	78
5.2.2	Borda Count	79
5.2.3	Hare System (Successive Deletion).....	80
5.2.4	Dictatorship.....	81
5.2.5	Pairwise Comparisons.....	82
5.3	Case Studies	84
5.3.1	Forest Treatment Problem.....	84
5.3.2	Ranking Water Resources Projects	87
5.4	Consensus on the Results	91
5.5	Discussions	93
6	Conflict Resolution Methods	95
6.1	Introduction.....	95
6.2	The Nash Bargaining Solution.....	96
6.3	The Non-symmetric Nash Solution	98
6.4	Area Monotonic Solution	100
6.5	Equal Loss Solution.....	101

6.6	Kalai–Smorodinsky Solution.....	103
6.7	Case Studies	104
6.7.1	Multi-reservoir Bi-objective Planning	104
6.7.2	Water Distribution Network Design	107
6.8	Discussions	111
7	MCDA Problems Under Uncertainty	113
7.1	Introduction.....	113
7.2	Probabilistic Methods	113
7.2.1	Certain Equivalents.....	114
7.2.2	Discrete Problems	117
7.2.3	Continuous Problems.....	120
7.3	Fuzzy Methods	125
7.3.1	Discrete Problems	126
7.3.2	Continuous Problems.....	129
7.4	Probabilistic-Fuzzy MCDA Models	130
7.5	Case Studies	133
7.5.1	Long-Term Watershed Management.....	133
7.5.2	Conservation or New Water Transfers?.....	139
 Appendix. Cumulative Distribution of the Standard		
	Normal Variable Function	149
