“地球物理基础丛书”序

Preface

Summary

<b>Chapter 1</b>	<b>Introduction</b>	1
<b>Chapter 2</b>	<b>Coordinate Systems and Transformations</b>	3
<b>Chapter 3</b>	<b>Earth's Gravity Field</b>	6
<b>Chapter 4</b>	<b>Earth's Density Model</b>	8
4.1	2-D Density Model	8
4.2	3-D Density Model	11
4.3	Concluding Remarks	15
<b>Chapter 5</b>	<b>Examples of Density Models</b>	16
5.1	Seawater Density Model	16
5.1.1	Data Acquisition and TEOS-10	18
5.1.2	Seawater Density Distribution	19
5.1.3	Accuracy Analysis	22
5.1.4	Concluding Remarks	25
5.2	Marine Sediment Density Model	26
5.2.1	Marine Sediment Data	28
5.2.2	Methodology	29
5.2.3	Numerical Analysis and Results	31
5.2.4	Model Uncertainties	32
5.2.5	Concluding Remarks	34
5.3	Ocean-Sediment and Sediment-Bedrock Density Interface	36
5.3.1	Methodology	37
5.3.2	Input Data	38
5.3.3	Results	38
5.3.4	Concluding Remarks	40
<b>Chapter 6</b>	<b>Earth's Crustal Density Model</b>	42
6.1	Methodology and Datasets	43
6.2	ESCM180 Spectrum	45

6.3	ESCM180 Spectral Characteristics .....	48
6.4	Average Density of Crustal Structures .....	52
6.5	Concluding Remarks .....	53
<b>Chapter 7</b>	<b>Gravimetric Forward Modeling .....</b>	<b>55</b>
7.1	Gravitational Field of 3-D Mass Density Layer .....	56
7.2	Gravitational Field of Radially-Varying Mass Density Layer .....	60
7.3	Gravitational Field of Laterally-Varying Mass Density Layer .....	60
7.4	Gravitational Field of Uniform Mass Density Layer .....	61
7.5	Concluding Remarks .....	61
<b>Chapter 8</b>	<b>Gravitational Field of Crustal Structures .....</b>	<b>63</b>
8.1	Methodology .....	63
8.2	Results .....	64
8.3	Correlation Analysis .....	68
8.4	Spectral Analysis .....	71
8.5	Concluding Remarks .....	75
<b>Chapter 9</b>	<b>Gravitational Model of Oceanic Lithosphere .....</b>	<b>76</b>
9.1	Methodology .....	76
9.2	Data Acquisition .....	77
9.3	Synthetic Gravitational Model .....	80
9.4	Validation of Results .....	83
9.5	Concluding Remarks .....	83
<b>Chapter 10</b>	<b>Gravimetric Moho Recovery .....</b>	<b>85</b>
10.1	Global Moho Recovery .....	87
10.1.1	Spectral Functional Model .....	87
10.1.2	Compensation Attraction .....	91
10.2	Moho Solution for Variable Moho Density Contrast .....	92
10.2.1	Functional Model .....	92
10.2.2	Compensation Attraction .....	93
10.3	Regional Moho Recovery .....	93
10.3.1	Discrete Functional Model .....	93
10.3.2	Discretization .....	95
10.4	Concluding Remarks .....	97
<b>Chapter 11</b>	<b>Global Gravimetric Moho Model .....</b>	<b>98</b>
11.1	Consolidated Crust-Stripped Gravity Disturbances .....	99
11.2	Moho Density Contrast .....	100
11.3	Mantle Gravity Disturbances .....	102
11.4	Moho Solutions .....	105

---

11.5	Validation of Results .....	107
11.6	Spectral Analysis .....	108
11.7	Correlation Analysis .....	111
11.8	Concluding Remarks .....	112
<b>Chapter 12</b>	<b>Sub-Crustal Stress Field .....</b>	<b>115</b>
12.1	Horizontal Sub-Crustal Stress .....	117
12.2	Vening Meinesz-Moritz Isostatic Model .....	118
12.3	Combined Model .....	119
12.4	Convergence Analysis .....	120
12.5	Concluding Remarks .....	122
<b>Chapter 13</b>	<b>Terrestrial Sub-Crustal Stress Field .....</b>	<b>124</b>
13.1	Global Sub-Crustal Stress Study .....	124
13.2	Regional Sub-Crustal Stress Studies .....	126
13.2.1	Stress Field Along Oceanic Subductions Zones .....	126
13.2.2	Stress Field at Hotspots .....	127
13.2.3	Stress Field Along Tectonic Plate Boundaries .....	128
13.2.4	Stress Field Along Continent-to-Continent Collision Zones .....	130
13.3	Concluding Remarks .....	132
<b>Chapter 14</b>	<b>Martian Sub-Crustal Stress Field .....</b>	<b>134</b>
14.1	Martian Topography .....	134
14.2	Martian Free-Air Gravity Field .....	136
14.3	Martian Bouguer Gravity Field .....	137
14.4	Martian Crustal Thickness .....	139
14.5	Martian Sub-Crustal Stress .....	141
14.5.1	Global Stress Field .....	141
14.5.2	Signature of Impact Craters .....	142
14.5.3	Signature of Hemispheric Dichotomy .....	142
14.5.4	Signature of Ice Load .....	142
14.5.5	Spectral Analysis of Stress Field .....	142
14.5.6	Long-Wavelength Stress Field .....	144
14.5.7	Tharsis Stress Field .....	145
14.6	Concluding Remarks .....	146
<b>References .....</b>		<b>149</b>
