

Foreword	1
<hr/>	
Part A Methodology	2
1 Identification of engineering research fronts	2
1.1 Acquisition and preprocessing of paper data	3
1.2 Mining of clustered literature topics	3
1.3 Determination and interpretation of research fronts	4
2 Identification of engineering development fronts	5
2.1 Acquisition and preparation of patent data	5
2.2 Mining of patent topics	5
2.3 Determination and interpretation of development fronts	5
3 Development roadmap	6
4 Terminologies	6
<hr/>	
Part B Reports in Different Fields	8
I. Mechanical and Vehicle Engineering	8
1 Engineering research fronts	8
1.1 Trends in Top 10 engineering research fronts	8
1.2 Interpretations for three key engineering research fronts	13
2 Engineering development fronts	22
2.1 Trends in Top 10 engineering development fronts	22
2.2 Interpretations for three key engineering development fronts	27
<hr/>	
II. Information and Electronic Engineering	37
1 Engineering research fronts	37
1.1 Trends in Top 10 engineering research fronts	37
1.2 Interpretations for three key engineering research fronts	43
2 Engineering development fronts	54
2.1 Trends in Top 10 engineering development fronts	54
2.2 Interpretations for three key engineering development fronts	60
<hr/>	
III. Chemical, Metallurgical, and Materials Engineering	72
1 Engineering research fronts	72
1.1 Trends in Top 12 engineering research fronts	72
1.2 Interpretations for three key engineering research fronts	77
2 Engineering development fronts	88
2.1 Trends in Top 10 engineering development fronts	88
2.2 Interpretations for three key engineering development fronts	92
<hr/>	
IV. Energy and Mining Engineering	103
1 Engineering research fronts	103
1.1 Trends in Top 12 engineering research fronts	103
1.2 Interpretations for four key engineering research fronts	108
2 Engineering development fronts	122
2.1 Trends in Top 12 engineering development fronts	122
2.2 Interpretations for four key engineering development fronts	129
<hr/>	

V. Civil, Hydraulic, and Architectural Engineering	140
1 Engineering research fronts	140
1.1 Trends in Top 10 engineering research fronts	140
1.2 Interpretations for three key engineering research fronts	145
2 Engineering development fronts	156
2.1 Trends in Top 10 engineering development fronts	156
2.2 Interpretations for three key engineering development fronts	161
<hr/>	
VI. Environmental and Light Textile Engineering	170
1 Engineering research fronts	170
1.1 Trends in Top 10 engineering research fronts	170
1.2 Interpretations for three key engineering research fronts	175
2 Engineering development fronts	185
2.1 Trends in Top 10 engineering development fronts	185
2.2 Interpretations for three key engineering development fronts	190
<hr/>	
VII. Agriculture	198
1 Engineering research fronts	198
1.1 Trends in Top 11 engineering research fronts	198
1.2 Interpretation for three key engineering research fronts	203
2 Engineering development fronts	216
2.1 Trends in Top 11 engineering development fronts	216
2.2 Interpretations for three key engineering development fronts	221
<hr/>	
VIII. Medicine and Health	230
1 Engineering research fronts	230
1.1 Trends in Top 10 engineering research fronts	230
1.2 Interpretations for three key engineering research fronts	238
2 Engineering development fronts	250
2.1 Trends in Top 10 engineering development fronts	250
2.2 Interpretations for three key engineering development fronts	258
<hr/>	
IX. Engineering Management	272
1 Engineering research fronts	272
1.1 Trends in Top 10 engineering research fronts	272
1.2 Interpretations for four key engineering research fronts	277
2 Engineering development fronts	295
2.1 Trends in Top 10 engineering development fronts	295
2.2 Interpretations for four key engineering development fronts	301
<hr/>	
Participants of General Plan Group	314
