

# Contents

<b>1 Introduction</b>	001
1.1 Status and Perspective of Nuclear Energy in China	001
1.2 Nuclear Power Technology in China	004
1.3 GEN-IV and SCWR	009
1.4 Status of SCWR R&D	015
1.5 Proposal of SCWR - M	022
<b>2 SCWR - M Core Design and Analysis</b>	025
2.1 Features of SCWR - M Core	026
2.1.1 Main criteria considered in SCWR core design	026
2.1.2 Features of SCWR - M core	027
2.2 Structures of Fuel Assemblies	029
2.3 Design Analysis Approaches	031
2.3.1 Neutronic approach	032
2.3.2 Thermal hydraulic code	034
2.3.3 Coupled approach	045
2.4 Design Analysis of Mixed Core (Results)	047
2.4.1 Core results (homogeneous fuel assembly)	047
2.4.2 Pin wise power distribution	054
2.4.3 Core and sub-channel analysis of the fresh core	056
2.4.4 Improvement of the SCWR - M core	060
2.5 Summary	064

<b>3</b>	<b>Safety System Design and Analysis</b>	065
3.1	Safety Requirements	065
3.2	Configuration of Safety Systems	067
3.3	Numerical Tools for Safety Analysis	071
3.3.1	ATHLET – SC code development	071
3.3.2	ATHLET – SC code verification and validation	084
3.3.3	Summary of the code development	091
3.4	Results of Safety Analysis	091
3.4.1	Initial condition and assumptions	091
3.4.2	LOFA analysis of SCWR – M	094
3.4.3	Key parameters analysis during LOFA	098
3.4.4	LOCA analysis of SCWR – M	110
3.5	Remarks for Future R&D Needs	123
<b>4</b>	<b>SCWR Thermal-Hydraulics</b>	125
4.1	Introduction	125
4.2	Heat Transfer	130
4.2.1	General features	130
4.2.2	Numerical analysis	136
4.2.3	Experimental studies	167
4.2.4	Prediction methods	194
4.3	Experimental Techniques Using Surrogate Fluids	219
4.4	Flow Stability	236
4.4.1	Static instability	237
4.4.2	Dynamic instability	247
<b>5</b>	<b>New Grade Materials for SCWR</b>	263
5.1	The Candidate Structural Materials for SCWR	263
5.2	Design and Fabrication of New Grade Cladding Materials	264
5.2.1	Processing of ODS steels	264
5.2.2	Microstructural observation	266
5.2.3	Mechanical property	270

5.3	SCW Corrosion Performance .....	273
5.3.1	Material and methods .....	274
5.3.2	Corrosion rate .....	274
5.3.3	Surface oxide analysis .....	275
5.3.4	Corrosion mechanism .....	278
5.3.5	SCC susceptibility .....	279

<b>Summary</b> .....	281
----------------------	-----

<b>Reference</b> .....	285
------------------------	-----

<b>SUBJECT INDEX</b> .....	301
----------------------------	-----
