Foreword	III
1 General provisions	1
2 Terms	2
3 Layout	4
3.1 General provisions	4
3.2 Drainage pump station at the initial stage	5
3.3 Drainage pump station at the regular period	5
4 Drainage calculation and equipment selection	7
4.1 The calculation of drainage quantity at initial stage	7
4.2 The calculation of drainage quantity at regular stage	9
4.3 The calculation of pump lift	11
4.4 Equipment selection	11
5 Design of drainage pump station	13
5.1 General provisions	13
5.2 The stationary pump station	14
5.3 The floating pump station	15
5.4 Other types of pump stations	18
5.5 Sump	18
5.6 The auxiliary equipment for the drainage pump station	19
5.7 The design of drainage pipeline	19
6 The construction for the drainage system	22
6.1 Cutoff ditch and sump	22
6.2 The installation of water pump	22
6.3 The construction of drainage pipeline	24

DL/T 5719 — 2015

7	Operation and maintenance	26
7.1	General provisions	26
7.2	Operation	26
7.3	Maintenance	28
Appendix A	Graphs and formulas of seepage flow calculation for some types of the earth and rock cofferdams and foundations	29
Appendix B	Calculation procedure for the drainage intensity at initial stage	39
	Explanation of the wording in the specification	41
	List of quoted standards	42
