Preface

Acknowledgements

Chapter 1 Introduction	1
1. 1 Background	1
1. 2 Contextual Studies on Safety Management	4
1. 3 An Institutional Theory Perspective	7
1. 4 The Hong Kong Context	8
1. 5 Research Aims, Questions and Objectives	11
1. 6 Scope of the Study	12
1. 7 Structure of the Book	13
Chapter 2 Theoretical Background	15
2. 1 Introduction	15
2. 2 The Emergence of the Neo-institutional Theory	15
2. 3 Core Concepts of the Institutional Theory	17
2. 3. 1 Organisational fields	17
2. 3. 1. 1 Definitions of organisational fields	17
2. 3. 1. 2 Structuration of organisational fields	18
2. 3. 1. 3 Issue-defined organisational fields	18
2. 3. 2 Institutions	19
2. 3. 3 Organisational legitimacy	21
2. 3. 3. 1 Definitions of organisational legitimacy	22
2. 3. 3. 2 Sources of legitimacy	22
2. 3. 3. 3 Antecedents and consequences of legitimacy	23
2. 3. 3. 4 Conflicts between legitimacy and efficiency	23
2. 3. 4 Institutional logics	23
2. 3. 4. 1 Definitions of institutional logics	24
2. 3. 4. 2 Institutional logics perspective and organisational heterogeneity	24
2. 4 Debate of Structure versus Agency	25

2.4.1	Institutional determinism	25
2.4.2	Competitive versus institutional influences on organisations	26
2.4.3	Institutional change, complexity, and strategic choice	27
2.4.3.1	Institutional change	27
2.4.3.2	A strategic choice perspective	30
2.4.3.3	Institutional complexity and organisational discretion	32
2.5	Concluding Remarks	35
Chapter 3 Towards An Analytical Framework of Institutional Complexity and Organisational Responses		36
3.1	Introduction	36
3.2	Institutional Complexity	36
3.2.1	Definitions of institutional complexity	37
3.2.2	Sources of institutional complexity	38
3.2.2.1	Central institutions at the society level	38
3.2.2.2	Multiple field-level institutional logics	39
3.2.2.3	The multiplicity of field constituents	40
3.2.2.4	Specificity of institutions	41
3.2.2.5	Conflicts between legitimacy and efficiency demands	42
3.3	Field Structure	42
3.3.1	Maturity of organisational field	42
3.3.2	Structure of organisational field	45
3.3.2.1	Field fragmentation	45
3.3.2.2	Field centralisation	45
3.3.2.3	Field formalisation	46
3.4	Organisational Filters	47
3.4.1	Field position	47
3.4.2	Structure	49
3.4.3	Ownership, relational dependency and governance	50
3.5	Organisational Responses	52
3.5.1	Strategic responses	52
3.5.2	Structural responses	55
3.6	Concluding Remarks	56
Chapter 4 Research Methods		57
4.1	Introduction	57
4.2	The Preference for Qualitative Research Strategy	57

4.3 Data Collection	61
4.3.1 Documentary and archival data	61
4.3.2 Case study	62
4.3.3 Semi-structured interviews	63
4.4 The Logic of Linking Prior Theory, Data and Research Findings	66
4.5 Concluding Remarks	68
Chapter 5 A Construction Safety-Defined Organisational Field	69
5.1 Introduction	69
5.2 Conceptualisation of an Issue-defined Organisational Field	69
5.2.1 The construction industry as an organisational field	69
5.2.1.1 Interactions	70
5.2.1.2 Inter-organisational structures	70
5.2.1.3 Information load	71
5.2.1.4 Mutual awareness	73
5.2.2 Construction safety-defined organisational field	73
5.3 Control and Coordination Mechanisms of Construction Safety-defined Organisational Field	76
5.3.1 A historical perspective	76
5.3.2 A historical analysis of the control and coordination mechanisms of construction safety-defined organisational field	78
5.3.2.1 Early days: 1913–1945	82
5.3.2.2 Embryonic stage: 1946–1967	83
5.3.2.3 Golden time: 1968–1988	85
5.3.2.4 Transition stage: 1989–now	90
5.4 Institutional Sources of Construction Safety	93
5.4.1 Regulative environment	93
5.4.2 Normative institutional environment	95
5.4.3 Cultural-cognitive institutional environment	96
5.4.4 The market environment	97
5.5 Concluding Remarks	98
Chapter 6 An Exploratory Case Study	99
6.1 Introduction	99
6.2 A Practice Perspective	99
6.3 Selection of the Case	100

6.4	The Case	100
6.4.1	Project background	100
6.4.2	Data collection	100
6.4.3	Data analysis	101
6.5	Findings	102
6.5.1	Competing goals of progress and safety	103
6.5.2	Mixed safety supervision patterns	103
6.5.3	Discrepancies in workers' safety awareness	104
6.5.4	Contractors' strategic responses; compromise	105
6.5.5	Contractors' strategic responses; avoidance	106
6.6	Discussion of Findings	107
6.7	Concluding Remarks	108
Chapter 7 Sources and Patterns of Institutional Complexity		109
7.1	Introduction	109
7.2	Multiple Institutional Demands of Site Safety	109
7.2.1	Legal requirements on site safety	110
7.2.1.1	The legislative framework	111
7.2.1.2	Enforcement actions	111
7.2.2	Clients' safety requirements	116
7.2.2.1	Pre-contract stage	116
7.2.2.2	Construction stage	118
7.2.3	Contractors' internal safety requirements	122
7.2.4	Voluntary safety schemes and standards	123
7.2.4.1	Field-level safety activities	124
7.2.4.2	Safety competition	125
7.2.4.3	Publicity of safety information	128
7.2.5	Relationships between multiple institutional demands	130
7.3	Multiple Safety Management Logics	131
7.4	Specificity of Legal Requirements	134
7.5	Efficiency, Legitimacy and Site Safety	135
7.5.1	Conflict between progress and safety requirements	135
7.5.2	Safety performance, organisational legitimacy and efficiency	137
7.5.2.1	Positive consequences of safety performance	137
7.5.2.2	Negative consequences of safety performance	139
7.6	Patterns of Institutional Complexity	141
7.6.1	Inconsistent regulatory demands	141

7.6.2	Regulatory uncertainty and rigidity	142
7.6.3	Redundant institutional demands	143
7.6.4	Conflict between safety demands and production efficiency	144
7.6.5	Disparate values and beliefs about safety and how to achieve safety	147
7.7	Concluding Remarks	150
Chapter 8 Organisational Filters and Strategic Responses		151
8.1	Introduction	151
8.2	Organisational Filters and General Safety Management Strategies	151
8.2.1	Field Positions and Management Strategies	152
8.2.1.1	Project client's field position	152
8.2.1.2	Construction company's field position	154
8.2.2	Project Organisation Structure and Governance	161
8.3	Contractors' Strategic Responses	163
8.3.1	Contractors' responses to regulatory requirements and enforcement actions	163
8.3.2	Contractors' experience of and responses to clients' safety requirements	166
8.3.3	Contractors' responses to field-level safety activities	168
8.3.3.1	Responses to major safety competition schemes	168
8.3.3.2	Responses to other field-level safety events	172
8.3.4	Contractors' responses to redundant safety demands	174
8.3.5	Contractors' responses to conflicting demands of production and safety	175
8.4	Concluding Remarks	176
Chapter 9 Conclusions		177
9.1	Introduction	177
9.2	Summary of Main Findings	177
9.2.1	Construction safety-defined organisational field	177
9.2.2	Sources of institutional complexity	179
9.2.2.1	Multiple institutional demands of site safety	179
9.2.2.2	Constellation of safety management logics	181
9.2.2.3	Conflict between legitimacy and efficiency demands	182
9.2.3	Patterns of institutional complexity	182
9.2.4	Organisational filters and general management strategies	183
9.2.5	Specific strategic responses	184
9.3	Theoretical Implications	187
9.3.1	Implications for institutional theory	187
9.3.2	Implications for construction safety research	189

9.4 Practical Implications	190
9.5 Limitations and Suggestions for Future Study	192
References	193
Appendices	210
Appendix 1 Summary of Empirical Studies Related to Institutional Complexity	210
Appendix 2 Semi-structured Interview Guide	214
Appendix 3 Field-level Actors Involved in Construction Safety Related Activities	217
Appendix 4 Tender Evaluation Approaches Used in HKHA and DB Contracts	219
Appendix 5 Summary of Safety Initiatives and Related Measures Used by HKHA	220
Appendix 6 Summary of Safety Initiatives and Safety Measures Adopted by Construction Companies	222
Appendix 7 Summary of Field-level Safety Events	226
Appendix 8 The Number of Participants and Award Winners in Three Major Competition Schemes	229
Appendix 9 Summary of Competition Themes of Construction Safety Forum	230
Appendix 10 Publications	231
