

Contents

<i>Preface</i>	vii
<i>Introduction</i>	ix
<i>Participants</i>	x
Part I. Physiology of the Epithelium	
1. <i>The Active Chloride Transport of the Frog Cornea</i> José A. Zadunaisky	3
2. <i>Relationship of Ion and Water Transport to Corneal Swelling</i> Keith Green	35
3. <i>The Flow of Water across the Corneal Layers</i> Bengt O. Hedbys and Saiichi Mishima	69
4. <i>The Intracellular Potential of the Cornea</i> Yoshizo Kikkawa	79
5. <i>The "Polygonal Cell" of the Corneal Epithelium</i> Seiji Sugiura	87
Part II. Molecular and Cellular Organization of the Stroma	
6. <i>Molecular Organization of Connective Tissue Matrix</i> Martin B. Mathews	107
7. <i>Electron Microscopy of Normal and Opaque Human Cornea</i> W. Schwarz and D. Graf Keyserlingk	123
8. <i>Cytoplasmic Granules of Keratocytes and Their Relationship to Formation of the Ground Substance</i> Shusaku Kitano	133
9. <i>Changes in Chemical Composition of the Corneal Stroma during Swelling</i> Toshifumi Otori	145
10. <i>The Interaction of Collagen and Mucopolysaccharides</i> Maurice E. Langham, Robert W. Hart, and James Cox	157
11. <i>The Rate of Deturgescence of the Swollen Cornea</i> Yoshizo Kikkawa	185

12. <i>The Physical State of Water in the Corneal Stroma</i> D. M. Maurice	193
Part III. Endothelial Studies	
13. <i>The Function of the Corneal Endothelium in the Regulation of Corneal Hydration</i> Saiichi Mishima, Gordon I. Kaye, Gordon H. Takahashi, Takamichi Kudo, and Sterling M. Trenberth	207
<i>Index</i>	237
