Preface xi
Author Biography xiii

Chapter 1 Nonlinear Dynamics 1

1.1 Dynamic Modeling 1
1.2 Nonlinear Oscillators 3
1.2.1 Nonlinear Pendulum 3
1.2.2 Nonlinear Mass-Spring Oscillators 4
1.3 Approximate Solution 5
1.3.1 Perturbation Method 5
1.3.2 Multiple Scales Method 9
1.3.3 Forced Oscillators 13
1.3.3.1 Approximate Solutions 13
1.3.3.2 Amplitude-Frequency Response 14
1.3.4 Coupled Oscillators 15
1.4 Modal Analyses 19

Chapter 2 Vibration Control 21

2.1 Linear Control 21
2.1.1 State Feedback 21
2.1.2 Model Reference Control 24
2.2 Nonlinear Control 24
2.2.1 Lyapunov Stability 24
2.2.2 Sliding Mode Control 25
2.3 Intelligent Control 26
2.3.1 Artificial Neural Networks 26
2.3.2 Fuzzy Logic 27
2.4 Input Shaper 28
2.4.1 ZV Shaper 28
2.4.2 ZVD Shaper 29
2.4.3 EI Shaper 29
2.4.4 MEI Shaper 30
2.5 Command Smoother 31
2.5.1 One-Piece Smoother 31
2.5.2 Two-Pieces Smoother 34
2.5.3 Three-Pieces Smoother 38
2.5.4 Four-Pieces Smoother 40
2.5.5 Smoother for Duffing Oscillators 43

Chapter 3 Bridge Cranes 47

3.1 Single-Pendulum Cranes 47
3.1.1 Modeling 47
3.1.2 Oscillation Reduction by Two-Pieces Smoother 49
3.1.3 Oscillation Control by Three-Pieces Smoother 51
3.2 Double-Pendulum Cranes 53
3.3 Distributed-Mass Payload Cranes 58
3.3.1 Planar Dynamics 58
3.3.2 Three-Dimensional Dynamics 63
3.3.2.1 Model 63
3.3.2.2 Dynamic Analysis 67
3.3.2.3 Numerical Verifications 68
3.3.2.4 Experimental Verifications 72
3.4 Wind Rejection 75
3.4.1 Model 75
3.4.2 Wind Rejection 77
3.4.3 Experimental Results 80
3.5 Eccentric-Load Dynamics 82
3.5.1 Modeling 83
3.5.2 Dynamics 87
3.5.2.1 Double-Pendulum Swing 87
3.5.2.2 Load Twisting 88
3.5.3 Control 90
3.5.4 Experiments 90

Chapter 4 Tower Cranes 99

4.1 Single-Pendulum Dynamics 99
4.2 Twisting Dynamics 102
4.2.1 Modeling 102
4.2.2 Dynamic Analysis 106
4.2.3 Oscillation Control 109
4.2.4 Computational Dynamics 110
4.2.4.1 Slewing 110
4.2.4.2 Sliding 113
4.2.5 Experimental Verification 115
4.3 Double-Pendulum and Twisting Dynamics 120
4.3.1 Modeling 120
4.3.2 Dynamics 124
4.3.3 Experimental Validation 127
4.4 Jib-Pendulum Dynamics 132
4.4.1 Modeling 132
4.4.1.1 Modeling of Pendulum Dynamics 134
4.4.1.2 Modeling of Jib Dynamics 136

4.4.2 Dynamics 138
4.4.3 Oscillation Suppression 140
4.4.4 Experimental Validation 142

Chapter 5 Aerial Cranes 151

5.1 Helicopter Slung Loads 151
5.1.1 Planar Dynamics 151
5.1.1.1 Modeling 151
5.1.1.2 Control 154
5.1.1.3 Computational Dynamics 157
5.1.2 Three-Dimensional Dynamics 167
5.1.2.1 Modeling 167
5.1.2.2 Control 173
5.1.2.3 Computational Dynamics 176
5.2 Quadcopter Slung Loads 183
5.2.1 Planar Dynamics 184
5.2.1.1 Modeling 184
5.2.1.2 Control 188
5.2.1.3 Computational Dynamics 195
5.2.2 Three-Dimensional Dynamics 203
5.2.2.1 Modeling 203
5.2.2.2 Control 207
5.2.2.3 Computational Dynamics 213
5.3 Quadcopters Slung Liquid Containers 223
5.3.1 Modeling 224
5.3.1.1 Compound-Pendulum Dynamics 225
5.3.1.2 Sloshing Dynamics 229
5.3.2 Control 232
5.3.2.1 Control of Quadrotor's Attitude 232
5.3.2.2 Control of Swing-Sloshing Dynamics 235
5.3.2.3 Control System Architecture 236
5.3.3 Computational Dynamics 237
5.3.3.1 Disturbance Rejection 237
5.3.3.2 Effectiveness of the Control System 239
5.3.3.3 Robustness of the Control System 242

Chapter 6 Dual Cranes 249

6.1 Planar Motions 249
6.1.1 Modeling 250
6.1.2 Vibration Control 255
6.1.3 Computational Dynamics 256
6.1.4 Experimental Verification 258
6.2 Three-Dimensional Motions 262
6.2.1 Modeling 262
6.2.2 Dynamics 264

6.2.3 Oscillation Control 266
6.2.4 Computational Dynamics 269
6.2.5 Experimental Investigation 271
6.3 Dual Aerial Cranes 274
6.3.1 Modeling of Dual Quadrotors Slung Loads 274
6.3.2 Model Reduction 278
6.3.2.1 Planar Model 278
6.3.2.2 Planar Near-Hover Model 279
6.3.3 Control of Dual Quadrotors Slung Loads 280
6.3.4 Computational-Dynamics Analyses 284

Chapter 7 Flexible Link Manipulators 287

7.1 Linear-Oscillator Dynamics 287
7.1.1 Modeling 288
7.1.2 Computational Dynamics 293
7.1.3 Experimental Investigation 295
7.2 Duffing-Oscillator Dynamics 299
7.2.1 Modeling 299
7.2.2 Experimental Investigation 303
7.3 Coupled Duffing-Oscillator Dynamics 308
7.3.1 Modeling 308
7.3.2 Vibration Control 314
7.3.3 Experimental Investigation 316

Chapter 8 Liquid Sloshing 321

8.1 Planar Linear Sloshing 321
8.1.1 Modeling 322
8.1.2 Computational Dynamics 325
8.1.3 Experimental Verification 328
8.2 Three-Dimensional Linear Sloshing 331
8.2.1 Modeling 331
8.2.2 Computational Dynamics 336
8.2.3 Experimental Verifications 339
8.3 Planar Nonlinear Sloshing 341
8.3.1 Modeling 342
8.3.2 Computational Dynamics 349
8.3.3 Experimental Results 352
8.4 Three-Dimensional Nonlinear Sloshing 355
8.4.1 Modeling 355
8.4.2 Computational Dynamics 364
8.4.3 Experimental Results 366
8.5 Pendulum-Sloshing Dynamics 366
8.5.1 Sloshing Modeling 367
8.5.2 Pendulum Modeling 369
8.5.3 Frequency Analyses 370

8.5.4 Oscillation Control 371
8.5.5 Computational Dynamics 372
8.5.6 Experimental Verification 374
8.6 Link-Sloshing Dynamics 379
8.6.1 Modeling 379
8.6.1.1 Modeling of Flexible Link 379
8.6.1.2 Modeling of Fluid Sloshing 382
8.6.2 Dynamics 384
8.6.3 Control 386
8.6.4 Experiments 388

Index 397
