|---|---|---|
| | *Preface* | *page* ix |
| 1 | **Introduction** | 1 |
| | 1.1 Background | 1 |
| | 1.2 Classification | 2 |
| | 1.3 Passive Flow Control | 5 |
| | 1.4 Active Flow Control | 14 |
| | 1.5 Concluding Remarks | 18 |
| | References | 19 |
| 2 | **Gurney Flap** | 23 |
| | 2.1 Background | 23 |
| | 2.2 Control of Airfoil | 23 |
| | 2.3 Control of Wing | 32 |
| | 2.4 Dynamic Flow Control | 42 |
| | 2.5 Concluding Remarks | 46 |
| | References | 46 |
| 3 | **Vortex Generator** | 48 |
| | 3.1 Background | 48 |
| | 3.2 Fundamental Flow Characteristics | 49 |
| | 3.3 Boundary Layer Control | 50 |
| | 3.4 Flow Separation Control | 53 |
| | 3.5 Lift Enhancement and Drag Reduction | 55 |
| | 3.6 Heat Transfer Enhancement | 61 |
| | 3.7 Concluding Remarks | 62 |
| | References | 63 |
| 4 | **Roughness** | 65 |
| | 4.1 Background | 65 |
| | 4.2 Roughness on Transition | 69 |
| | 4.3 Roughness on Turbulence | 85 |
| | 4.4 Concluding Remarks | 92 |
| | References | 92 |

| | | |
|---|---|---|
| 5 | **Polymer** | 94 |
| | 5.1 Background | 94 |
| | 5.2 Polymer for Pipe Flow | 94 |
| | 5.3 Polymer for Channel Flow | 100 |
| | 5.4 Polymer for Coherent Structures | 103 |
| | 5.5 Concluding Remarks | 107 |
| | References | 107 |
| 6 | **Biological Techniques** | 108 |
| | 6.1 Background | 108 |
| | 6.2 Hairy Coating | 110 |
| | 6.3 Leading-Edge Tubercles | 115 |
| | 6.4 Riblet | 129 |
| | 6.5 Cactus-Shape Modification | 132 |
| | 6.6 Concluding Remarks | 138 |
| | References | 138 |
| 7 | **Jet** | 141 |
| | 7.1 Background | 141 |
| | 7.2 Fundamental Characteristics | 141 |
| | 7.3 Jets for Flow Control | 147 |
| | 7.4 Novel Conceptions Based on Jets | 156 |
| | 7.5 Concluding Remarks | 165 |
| | References | 165 |
| 8 | **Synthetic Jet** | 168 |
| | 8.1 Principle | 168 |
| | 8.2 Influence of Parameters | 170 |
| | 8.3 Characteristics of Velocity Field | 176 |
| | 8.4 Novel Synthetic Jet | 178 |
| | 8.5 Numerical Model | 179 |
| | 8.6 Applications of Synthetic Jets | 183 |
| | 8.7 Concluding Remarks | 200 |
| | References | 201 |
| 9 | **Plasma Actuator** | 206 |
| | 9.1 Background | 206 |
| | 9.2 Classification of Plasma Actuators | 206 |
| | 9.3 Conventional Applications | 211 |
| | 9.4 Novel Plasma Actuators | 228 |
| | 9.5 Concluding Remarks | 241 |
| | References | 241 |

| | | |
|---|---|---|
| **10** | **Lorentz Force** | 246 |
| | 10.1 Background | 246 |
| | 10.2 Boundary Layer | 247 |
| | 10.3 Airfoil | 255 |
| | 10.4 Bluff Body | 261 |
| | 10.5 Concluding Remarks | 263 |
| | References | 264 |
| **11** | **Closed-Loop Control** | 266 |
| | 11.1 Background | 266 |
| | 11.2 Closed-Loop Based on Reduced-Order Model | 267 |
| | 11.3 Closed-Loop Based on Measured Variables | 268 |
| | 11.4 Concluding Remarks | 275 |
| | References | 277 |
| | *Index* | 278 |
