

TABLE OF CONTENTS

1. BACKGROUND TO THE INDUSTRY	1
1.1 Definition	1
1.2 Industrial Connectivity	1
1.3 Aerospace Manufacturing	2
1.4 Aerospace Firms	3
1.5 Interindustry Linkages	5
1.6 Role of Innovation	6
1.7 Technological Inputs and Outputs	9
1.8 Responsiveness to Demand	10
1.9 Merger and Vertical Integration	11
2. THE MARKET LEADER: AEROSPACE IN THE USA	15
2.1 The Dimensions	15
2.2 The Enterprises	17
The Jetliner Manufacturers	18
The Military Prime Contractors	19
The Main Players in General Aviation	20
The Space and Missile Specialists	22
The Aeroengine Companies	24
The Avionics and Systems Giants	25
3. AEROSPACE IN THE SOVIET BLOC	27
3.1 Introduction	27
3.2 Organisation	29
3.3 The "Satellite" Industries	32
Poland	32
Czechoslovakia	33
Romania	34
4. INTERNATIONAL VENTURES	37
4.1 The Rationale	37
4.2 The Airbus Saga	38
4.3 Other Collaborative Airliner Programmes	41
4.4 Collaborative Defence Programmes	42
4.5 International Aeroengine Programmes	46
5. AEROSPACE IN EUROPE AND THE OTHER AICs	49
5.1 Introduction	49
5.2 The European Heartland	49
France	52
The UK	54
West Germany	56
Italy	57

5.3 Other Significant European Producers	58
5.4 Aerospace in Other AICs	60
Japan	61
Canada	62
Australia	63
6. AEROSPACE IN THE NEWLY-INDUSTRIALISING COUNTRIES	67
6.1 An overview	67
6.2 The Military Imperative	69
Israel	70
India	71
China	72
Taiwan	74
South Africa	74
Argentina	75
Yugoslavia	76
Egypt	77
6.3 Industrial Development and Export-Led Growth	78
Brazil	78
Indonesia	80
6.4 Tentative Beginnings	82
7. TECHNICAL CHANGE IN THE AIRCRAFT SEGMENT	85
7.1 Introduction	85
7.2 Aircraft Forecasts	86
Military Aircraft	88
V/STOL Systems	92
Commercial Aircraft	94
8. PROPULSION FORECASTS	99
8.1 Gas-Turbine Aeroengines	99
8.2 Piston, Rotary and Diesel Aeroengines	101
8.3 Petroleum-Based Aviation Fuels	101
8.4 Cryogenic Fuels	102
8.5 Exotic Fuels	103
9. CHANGES IN AEROSPACE MATERIALS AND AVIONICS	105
9.1 Metals	105
9.2 Plastics, Ceramics and Composites	106
9.3 Computer Systems	107
9.4 Avionics	108
10. SPACE TECHNOLOGY FORECASTS	111
10.1 Communications Systems	111
10.2 Spaceborne Computer Systems	113
10.3 Navigation, Positioning and ATC Satellite Systems	113
10.4 Remote Sensing Satellite Systems	114
10.5 Large Space Structures and	

Industrialisation	114
10.6 Military Systems	115
10.7 Transportation Systems	116
11. TRENDS IN AEROSPACE PROCESS TECHNOLOGY	119
11.1 Manufacturing Systems	119
11.2 Material Processing Methods	121
12. CONCLUSION	123
12.1 The Nature of the Industry	123
12.2 Implications Arising from the Spread of Aerospace Production	124
12.3 The Consequences of Technological Advances	126
GLOSSARY	127

STATISTICAL APPENDICES
