

Table of Contents

Chapter 1	A Review of Additive Manufacturing	1
Chapter 2	Rotorcraft Design for Maximized Performance at Minimized Vibratory Loads	37
Chapter 3	PTVC-M for Ultra-Agile VTOL and 300+ km · h ⁻¹ Cruising	75
Chapter 4	Advancement of Compositional and Microstructural Design of Intermetallic γ -TiAl Based Alloys Determined by Atom Probe Tomography	99
Chapter 5	Graphene/Epoxy Coating as Multifunctional Material for Aircraft Structures	151
Chapter 6	Modelling of the Wireless Propagation Characteristics inside Aircraft	173
Chapter 7	Concurrent Subspace Optimization for Aircraft System Design	209
