

Contents

Foreword		vii
Aftab Mufti		
Preface		xi
Chapter 1	Damage Detection and Model Updating of Civil Engineering Structures	1
Tommy H. T. Chan, David P. Thambiratnam and Khac-Duy Nguyen		
Chapter 2	Effective Sensitivity-Based Model Updating of Cable-Stayed Bridges Considering Monitoring Data Variability	71
Thomas Sharry, Hong Guan, Andy Nguyen, Erwin Oh and Nam Hoang		
Chapter 3	Drive-by Bridge Structural Health Monitoring: A Case Study on Modal Identification Using a Mobile Sensory System	113
Jiantao Li, Xinqun Zhu, Bing Zhang and Bijan Samali		
Chapter 4	Damage Detection of Partially Immersed Plates Using Guided Waves	137
X. Hu, C. T. Ng and A. Kotousov		
Chapter 5	Classification for Images of Corroded Steel by Image Processing Technology	169
Rina Hasuike, Koji Kinoshita and Lei Hou		

Chapter 6	Data-Driven Structural Health Monitoring Based on Deep Learning Techniques	187
	Jun Li, Ruhua Wang, Hong Hao and Ling Li	
Chapter 7	Robustness of Deep Transfer Learning-Based Crack Detection against Uncertainty in Hyperparameter Tuning and Input Data	215
	Andy Nguyen, Riccardo R. Chianese, Vahid R. Gharehbaghi, Ruveen Perera, Tobias Low, Thiru Aravinthan, Yang Yu, Bijan Samali, Hong Guan, Tung Khuc and Thach N. Le	
Chapter 8	Smart Automated Fault Detection for Improved Road Maintenance Planning in Australia	245
	Jacob Brisolin, Andy Nguyen, Fahim Ullah, Allan Bourke, Tung Khuc and Vivien Nsanabo	
Chapter 9	Applications of Non-Destructive Damage Evaluation and Structural Health Monitoring in Railway Track Maintenance	279
	Ralph Zhang, Helen Wu and Richard (Chunhui) Yang	
Chapter 10	Risk Management and Prioritisation of Rail Service Failures in Railway Track Maintenance	319
	Ralph Zhang, Helen Wu and Richard (Chunhui) Yang	
Chapter 11	Digital Twin Approach for Lifecycle Management of Large-Scale Civil Infrastructure	363
	Tuan-Cuong Nguyen, Tuan Ngoc Nguyen, Dac-Khuong Bui and Tuan Duc Ngo	
	Editors' Contact Information	385
Index		387
