<i>Preface</i>	<i>xix</i>
PART I: NANOTECHNOLOGY AND NANOMATERIALS	1
1. Carbon Nanotubes and Fullerenes: Promising Materials for Biosensor Technology	3
Nidhi Sharma, Neetu Talreja, Divya Chauhan, and Mohammad Ashfaq	
2. Applications of Carbon Nanotubes in Pathogenic Microbe Detection	21
Divya Neravathu Gopi, Mohammed Saju M., and Riju K. Thomas	
3. Cold Plasma—An Efficient Tool for Nanotechnological Modification of Polyester-Based Polymers	33
Igor Novák, Anton Popelka, Ivan Chodák, Ján Sedliačik, Angela Kleinová, Matej Mičušík, Ján Matyašovský, Peter Jurkovič, Katarína Valachová, and Ladislav Šoltés	
PART II: APPLIED POLYMER MATERIALS	57
4. Effect of Bulk and Surface Properties of Polymeric Scaffolds on Its Applications in Tissue Engineering	59
Deepak Poddar	
5. Intricate Dissection of the Realm of Biopolymer Films in Regenerative Medicine and Other Pioneering Therapeutic Advances	87
Darieo Thankachan, Jacob Mathew, and Neha Kanwar Rawat	
6. Recent Progress in Conducting Polymeric Films for Biomedical Application	109
Kiran Rana, Rinky Ghosh, and Neha Kanwar Rawat	
7. Biopolymer Sustainable Films for Food Industries: Properties and Application Based on Chitosan	121
G. Santhosh and Aarthi S. Bhatt	

8. Biopolymer Matrices: Current Trends in Tissue Engineering	139
Aarthi S. Bhatt and G. Santhosh	
9. Biopolymer Sustainable Films: Mechanical and Biological Properties	157
Harshitha M Jathanna and G. Santhosh	
PART III: SOLID MATERIALS.....	173
10. Computational Analysis of X_3O_4 (X= Mn, Fe, and Co) Nanofibers.....	175
Shayeri Das, Prabhat Ranjan, and Tanmoy Chakraborty	
11. Solid Materials for Applications in Life Sciences: An Introduction.....	187
Shayeri Das, Prabhat Ranjan, and Tanmoy Chakraborty	
PART IV: COMPOSITE MATERIALS	201
12. Assessment of Technogenic Raw Materials for the Production of Glass Materials and Course on “Green” Growth	203
Berdzenishvili Irine, Siradze Manana, Chkhaidze Ekaterina, and Antia Giorgi	
13. Synthesis and Investigation of Environment-Friendly Silicon-Containing Carbohydrates Derivatives	209
N. N. Sidamonidze, R. A. Gakhokidze, R. O. Vardiashvili, and M. O. Nutsubidze	
14. Hot Shock Wave Consolidation and Syntheses of W-MG Composites ..	215
Akaki Peikrishvili, Laszlo Kecskes, Elguja Chagelishvili, and Bagrat Godibadze	
15. Some Aspects Concerning Conformation of Polypeptide Chains in Biosystems	225
G. A. Korablev, V. I. Kodolov, and G. E. Zaikov	
16. Polymer-Based Fibers: The Role of Solution Rheology in Fibers Production.....	239
Andreea Irina Barzic	
PART V: ENERGY MATERIALS	261
17. Smart Nanomaterials in Energy Applications.....	263
N. G. Divya, Mohammad Saju, Ann Roshna, and Riju K. Thomas	
18. Nanofibers for Energy Application.....	281
Saurabh Pandey, Abhishek Anand, Amritanshu Shukla, and Atul Sharma	
Index.....	307
