

Table of Contents

Preface	v
Chapter 1: Composite Materials	
A Machine Learning Model for Flaw Identification in Fibre-Reinforced Composites W. Hall, A. Kromik, B. Miller, I. Underhill and Z. Javanbakht	3
Mechanical and Thermal Analysis of Nito Fiber Reinforced Composites R.S.B. Sosa and J.C. Millare	9
Asymmetric Four Point Bend Test Method for Interlaminar Shear Strength in Ceramic Matrix Composites P. Jadhav and C. Lande	17
Effects of Irradiation Dose of Sheet-Like Electron Beam and its Cathode Voltage on Impact Strength of Carbon Fiber Reinforced Thermoplastic Polyamide just before Shipping K. Sagawa, H. Kimura, T. Ishiwata, M.C. Faudree, H.T. Uchida and Y. Nishi	23
Microscopic Formation Mechanism and Physical Properties of Mo/Cu Composites with High Densification Q. Li, Z.D. Li, H.F. Xie, L.J. Peng and X.J. Mi	33
Handling Composites at Aircraft Accident Sites: An Evaluation of the Fracture Features in Burnt CFRP after the Application of a Fixant Solution N. Zimmermann, P.H. Wang and K. Pullen	43
A Review of Biodegradable Polymer Blends and Polymer Composite for Flexible Food Packaging Application S. Govindan, M. Ramos and A.M. Al-Jumaily	49
Chapter 2: Zirconia and Zirconia-Based Composites	
The Effect of Zirconia Content on Physical and Mechanical Properties of Al ₂ O ₃ /ZrO ₂ Composites C.F.K. Murti, P.Z.N. Nehan, A.S. Sa'adah, A.R. Setopratama, F. Munawaroh, Munaji and Triwikantoro	61
Temperature and Molarity Effects on the Synthesized Zircon Crystal Cells D.Y. Pratama, A.B.G. Valhalla, S. Ely, A.M. Hatta and P. Suminar	67
The Conductivity of PANI/Zirconia Composites: Effect of Amorphous and Crystalline Fillers Munaji, M.A.C. Azhari, Z. Arifin, M. Zainuri and Triwikantoro	73
Structural and Thermal Analysis of CaCO ₃ /ZrO ₂ Composites F. Munawaroh, M.A. Baqiya, Z. Arifin and Triwikantoro	79
Chapter 3: Carbon-Based Materials	
Interaction of Hydrogen with Reduced Graphene Oxide Probed by Muon-Spin Relaxation Technique R. Asih, D.P. Sari, M.A. Baqiya, I. Watanabe and Darminto	87

Disorder - Induced Characteristics Based on Optical Absorption of SiO₂/rGO-Like Carbon Films	
F. Faridawati, Sudarsono, A. Sholih, G. Yudoyono and Darminto	93
Mechanical-Thermal Stability of Micro Composite Based Porous Carbon from Coconut Shell (<i>Coccoloba nucifera</i>) Charcoal	
M.S. Sapri and Mashuri	99
Optical Absorbance of Graphenic Carbon from Coconut Shells in Different Solvents for Film Preparation	
Sudarsono, A. Sholih, F. Faridawati, G. Yudoyono and Darminto	105
N-Doped Graphenic Carbon Derived from Coconut Shell as n-Type Semiconducting Layer	
E. Purwandari, N. Nur'aini, A.A. Firdaus, A. Sholih, R. Asih, A. Subekti and Darminto	111
Study on Optical Energy Gap and the Thickness of Boron Doped Graphenic Carbon (B-GC) Film Prepared by Nanospray Method	
A.A. Firdaus, E. Purwandari, R. Asih, A. Sholih and Darminto	117
Probing the Magnetic Properties of Boron-Doped Graphenic-Based Carbon Materials	
D. Ristiani, P.Y.D. Maulida, A.A. Firdaus, R. Asih, F. Astuti, M.A. Baqiya, S. Tunmee, H. Nakajima and Darminto	123
Chapter 4: Functional Materials and Semiconductor Structures	
Measuring the Capacity of a Proposed Vibration Isolator Using Auxetics Sheets	
P. Townsend, J.C. Suárez, I. Mendoza and D. Townsend	131
Comparison of Carrier Deflection between MAG-TFET and MAG-FinFET	
T. Boonlua, A. Poyai and T. Phetchakul	137
Keyword Index	153
Author Index	155
