Foreword	xi
Preface	xiii
Acknowledgments	xv
List of Figures	xvii
List of Tables	xxiii
1. Introduction	1
1.1 Background	1
1.2 Empirical Models	2
1.2.1 Critical Steel Corrosion at Surface Cracking	2
1.2.2 Crack Width at the Concrete Surface	4
1.2.3 Discussion on the Empirical Models	6
1.3 Analytical Models	7
1.3.1 Three-Stage Corrosion-Induced Cracking Model	7
1.3.2 Corrosion Products Filling Stage	8
1.3.3 Concrete Cover Stressing and Cracking	10
1.3.4 Rust Filling in Corrosion-Induced Cracks	13
1.4 Contents of This Book	13
References	15
2. Steel Corrosion in Concrete	19
2.1 Introduction	19
2.2 Mechanisms of Steel Corrosion in Concrete	20
2.2.1 Corrosion Process	20
2.2.2 Corrosion Rate	21
2.2.3 Passivation	21
2.3 Steel Corrosion Induced by Carbonation or Chloride Attack	22
2.3.1 Carbonation-Induced Corrosion	23
2.3.2 Chloride-Induced Corrosion	23
2.4 Corrosion Products	25
2.5 Steel Corrosion-Induced Concrete Damage	27
2.6 Conclusions	28
References	29

3. The Expansion Coefficients and Modulus of Steel Corrosion Products	31
3.1 Introduction	31
3.2 Expansion Coefficient of Steel Corrosion Products	33
3.2.1 Experimental Program	33
3.2.2 Tested Results	33
3.2.3 Composition of Rust Samples	39
3.2.4 Expansion Coefficient of Rust Samples	42
3.3 Modulus of Steel Corrosion Products in Concrete	46
3.3.1 Experimental Program	46
3.3.2 Loading and Unloading Stress—Strain Curve	48
3.3.3 Tested Data of Cyclic Low-Compression Test	49
3.3.4 Modulus of Rust	49
3.4 Conclusions	51
References	52
 4. Damage Analysis and Cracking Model of Reinforced Concrete Structures with Rebar Corrosion	 55
4.1 Introduction	55
4.2 Basic Concrete Cracking Model Due to Steel Corrosion	56
4.3 Noncracking Stage of Corrosion-Induced Concrete Cracking Process	57
4.4 Partial Cracking Stage of Corrosion-Induced Concrete Cracking Process	60
4.4.1 Intact Part	60
4.4.2 Cracked Part	61
4.5 Corrosion-Induced Expansive Pressure	66
4.5.1 Relation Between Expansive Pressure and Steel Corrosion	67
4.5.2 Variation of Expansive Pressure	67
4.5.3 Effect of Concrete Cover Thickness	68
4.5.4 Effect of Steel Bar Diameter	70
4.5.5 Effect of Concrete Quality	71
4.6 Discussion on the Radial Loss of Steel Bar	72
4.6.1 Steel Loss Varying with the Crack Length	72
4.6.2 Effect of Concrete Cover Thickness	73
4.6.3 Effect of Steel Bar Diameter	73
4.6.4 Effect of Rust Expansion Coefficient	75
4.6.5 Effect of Concrete Quality	75
4.7 Conclusions	75
References	76

5. Mill Scale and Corrosion Layer at Concrete Surface Cracking	79
5.1 Introduction	79
5.2 Experimental Program	80
5.2.1 Reinforced Concrete Specimens	80
5.2.2 Accelerated Steel Corrosion	81
5.2.3 Sample Preparation	81
5.2.4 Observation and Measurement	83
5.3 Rust Distributions in the Cracking Sample	84
5.4 Mill Scale	86
5.5 Corrosion Layer Thickness at Surface Cracking of Concrete Cover	87
5.5.1 At Outer Surface Cracking	87
5.5.2 At Inner Surface Cracking	89
5.6 Conclusions	91
References	92
 6. Rust Distribution in Corrosion-Induced Cracking Concrete	 93
6.1 Introduction	93
6.2 Experimental Program	94
6.2.1 Reinforced Concrete Specimen	94
6.2.2 Curing and Exposure History	94
6.2.3 Sample Preparation	95
6.2.4 Observation and Measurements	96
6.3 Rust Distributions at the Steel-Concrete Interfaces	97
6.4 Distribution of the Corrosion Products-Filled Paste	100
6.5 Rust Distribution in Corrosion-Induced Cracks	101
6.5.1 Rust Distribution in Cracks by Digital Microscope	101
6.5.2 Rust Filling in Cracks by SEM	104
6.5.3 Discussion of Rust Filling Corrosion-Induced Cracks	107
6.6 Rust Development in Concrete Cracks	107
6.7 Conclusions	108
References	109
 7. Nonuniform Distribution of Rust Layer Around Steel Bar in Concrete	 111
7.1 Introduction	111
7.2 Steel Corrosion and Corrosion-Induced Cracks	112
7.3 Gaussian Model to Describe the Nonuniform Rust Layer	113

7.4	Comparing the Proposed Gaussian Model With Other Models	117
7.5	Parameters in Gaussian Model	118
7.5.1	λ_3 : Uniform Coefficient of the Rust Layer	118
7.5.2	λ_1 : Nonuniform Coefficient of the Rust Layer	120
7.5.3	λ_2 : Spread Coefficient of Rust Layer	122
7.5.4	Relationships Among Parameters Before Concrete Surface Cracking	123
7.6	Conclusions	126
	References	126
8.	Crack Shape of Corrosion-Induced Cracking in the Concrete Cover	129
8.1	Introduction	129
8.2	Experimental Program	130
8.2.1	Reinforced Concrete Specimens	130
8.2.2	Accelerated Corrosion History	131
8.2.3	Sample Preparation	132
8.2.4	Observation and Measurement	132
8.3	Crack Shape	134
8.3.1	Crack Width Model	134
8.3.2	a_1 : Crack Width Variation Coefficient	134
8.3.3	a_2 : Crack Width Coefficient at the Surface of the Steel Bar	138
8.4	Crack Width and Corrosion Layer Thickness	138
8.4.1	Relationship Between Crack Width, W_i , and Corrosion Layer Thickness, T_{CL}	138
8.4.2	W_c : Critical Crack Width at Concrete Outer Surface Cracking	140
8.4.3	W_s : Crack Width on the Surface of Concrete Cover	140
8.5	Relationship of Corrosion Layer Thickness T_{CL} and Crack Width Variation Coefficient a_1	141
8.6	Crack Shape in Different Types of Concrete	143
8.7	Conclusions	145
	References	145
9.	Development of Corrosion Products-Filled Paste at the Steel-Concrete Interface	147
9.1	Introduction	147
9.2	Influence of Cracks on CP Thickness	148
9.3	Relation Between T_{CP} and T_{CL} Excluding the Effect of Inner Cracks	149
9.4	Relation Between T_{CP} and T_{CL} Including the Inner Cracks	153
9.5	Conclusions	157
	References	157

10. Steel Corrosion-Induced Concrete Cracking Model	159
10.1 Introduction	159
10.2 Corrosion-Induced Concrete Surface Cracking Model	
Considering CP	160
10.2.1 Cracking Process Description	160
10.2.2 $T_{CP} - T_{CL}$ Model	161
10.2.3 Nominal Ratio Between the Corrosion Products Volume and the Basic Steel Volume	162
10.3 Time From Corrosion Initiation to Concrete Surface	
Cracking	164
10.3.1 Faraday's Law	164
10.3.2 Corrosion Rate	165
10.4 Discussion of Nonuniform Corrosion Situation	167
10.5 Discussion of Influence of Loading on the Cracking Model	168
10.5.1 Force Contributed by the Mechanical Interlocking	168
10.5.2 Intersecting Cracks and Localized Corrosion	169
10.6 Conclusions	170
References	170
 Notations	 171
Index	175
