

Contents

Chapter 1 Kinematics of a Particle	1
1.1 Equation of motion and trajectory of a particle	2
1.2 Velocity and acceleration of a particle with the vector method	6
1.3 Velocity and acceleration of a particle with the rectangular coordinate method	7
1.4 Velocity and acceleration of a particle with the natural method	10
1.5 Projections of velocity and acceleration of a particle on cylindrical and polar coordinates	16
1.6 Coordinate transformation	18
Problems	20
Chapter 2 Fundamental Kinematics of a Rigid Body	25
2.1 Translation of a rigid body	26
2.2 Rotation of a rigid body about a fixed axis, angular velocity vector and angular acceleration vector	29
2.3 Velocity and acceleration of point on a rotating rigid body	33
2.4 Transmission ratio of the wheel system	38
Problems	41
Chapter 3 Complex Motion of Particle (or Point)	47
3.1 Concepts of complex motion	48
3.2 Composition theorem of velocity for point	52
3.3 Composition theorem of acceleration when the transport motion is translation	55
3.4 Composition theorem of acceleration when the transport motion is rotation	61
Problems	67
Chapter 4 Planar Motion of a Rigid Body	73
4.1 The basic concept and decomposition of rigid body planar motion	74
4.2 Velocity of point in a planar motion	77
4.3 Acceleration of point in a planar motion	86
Problems	91
Chapter 5 Dynamics of Particle	97
5.1 Basic laws of dynamics	98
5.2 Equations of motion for a particle	99
5.3 Two types of basic problems in the dynamics of particle	101
Problems	103

Chapter 6 Theorem of Momentum	107
6.1 Momentum of particle and system of particles	108
6.2 Impulse of force	110
6.3 Theorem of momentum for particle and system of particles	111
6.4 The center of mass motion theorem	115
Problems	118
Chapter 7 Theorem of Moment of Momentum	121
7.1 Moment of momentum of a particle and a system of particles	122
7.2 Moment of inertia of a rigid body and parallel-axis theorem	124
7.3 Theorem of moment of momentum	127
7.4 Differential equations for the rotation of a rigid body about a fixed axis	131
7.5 Theorem of moment of momentum for a system of particles about the center of mass	133
7.6 Differential equations of plane motion for rigid body	136
Problems	141
Chapter 8 Theorem of Kinetic Energy	147
8.1 Work of a force	148
8.2 Theorem of kinetic energy for particles	151
8.3 Theorem of kinetic energy for a system of particles	153
8.4 Potential field, potential energy, and law of conservation of mechanical energy	156
8.5 Power, power equation, mechanical efficiency	161
Problems	163
Chapter 9 d'Alembert Principle and Virtual Displacement Principle	169
9.1 d'Alembert principle for particle	170
9.2 d'Alembert principle for systems of mass points	173
9.3 Reduction of inertial force system	174
9.4 Constraint, virtual displacement, virtual work	179
9.5 Principle of virtual displacement	183
Problems	185
Chapter 10 Vibrations	191
10.1 Undamped free vibration	192
10.2 Undamped forced vibration	195
10.3 Viscous damped free vibration	199
10.4 Viscous damped forced vibration	202
Problems	204
References	207
