Foreword	v
Preface	vii
About the Author	ix
Acknowledgements	xi
Chapter 1 Ten essentials of facilities planning and design	1
1.1 Definitions	2
1.2 The importance of facilities planning and design	2
1.3 Ten essentials that facility managers need to know about facilities planning and design	3
1.4 Essential #1a — Understanding the phases in the life of a facility	9
1.5 Essential #1b — Knowing the parties involved in the development of a building	15
1.6 Summary	17
Chapter 2 Strategic planning and the facility master plan	21
2.1 What is strategic planning?	22
2.2 The strategic planning process	26
2.3 Essential #2a — How the organisation's strategic plan drives the need for facilities	28
2.4 Essential #2b — Why the facility master plan should be aligned with the organisation's strategic plan	33
2.5 Dealing with uncertainty in facility master planning	36

Chapter 3 The owner's role in planning and design	39
3.1 Essential #3a — Responsibilities of the OwnerRep during planning and design	40
3.2 The strategic brief	45
3.3 Essential #3b — Managing the selection process for design consultants	49
3.4 Evaluation criteria and weightage for design consultants	51
3.5 Case study: Singapore Building Construction Authority (BCA) Quality Fee Method (QFM) framework	54
Chapter 4 Space standards and universal design	59
4.1 Essential #4a — Space and humans — Recognising how occupants and their activities impact the size and design of a space	60
4.2 People with disabilities	64
4.3 Essential #4b — Universal Design — Making spaces accessible to all	65
4.4 Essential #4c — Area definitions and measurement methods	70
4.5 Essential #4d — Space standards	72
Chapter 5 Programming and site selection	77
5.1 What is "programming of buildings"?	78
5.2 Essential #5a — Learning the process for programming building spaces	82
5.3 Programmatic concepts	87
5.4 Essential #5b — The site selection process	94
5.5 Site evaluation criteria	96
5.6 Examples of site selection processes and site selection criteria	99

Chapter 6 Facility master planning	105
6.1 Urban planning	106
6.2 The facility master plan — Planning on a campus level	110
6.3 Essential #6 — Learning about the master planning process	114
6.4 Case study: Airport master plan	116
6.5 Case study: University master plan	123
Chapter 7 Environmental planning	129
7.1 Essential #7a — Understanding the environmental impacts of development	130
7.2 Essential #7b — Learning the key aspects of the environmental impact assessment process	135
7.3 Stakeholders	143
7.4 Case study: Hong Kong International Airport Three-Runway System	145
Chapter 8 Capital improvement planning	153
8.1 Capital improvement planning	154
8.2 Essential #8 — Learning the key aspects of the capital improvement planning process and how to put together a capital improvement plan for a large facility	156
8.3 CIP Process step 1 — Creating a list of potential projects	158
8.4 CIP Process step 2 — Gathering information for each project	160
8.5 CIP Process step 3 — Prioritising the projects	163
8.6 CIP Process step 4 — Finalising the list of projects	165
8.7 Case study: Singapore Government capital budget and projects	165
8.8 Keeping stakeholders informed about capital projects	170

Chapter 9 Workplace planning and design	173
9.1 Key trends that are driving change in organisations and the workplace	174
9.2 Changes in workspaces, meeting spaces, support spaces and technology	177
9.3 Essential #9 — Considerations that must be taken in the planning and design of offices	181
9.4 Challenges in implementing a new office concept	185
9.5 Coworking spaces	187
9.6 Hybrid working	190
Chapter 10 Space management	195
10.1 Importance of managing space in a facility	196
10.2 Gathering information about the space	198
10.3 Essential #10a — Creating or updating the space management policy	201
10.4 Essential #10b — Using technology for space management	205
10.5 Example: Space management at a large university campus	209
